Journal of Testing and Evaluation
Author Index to Volume 41
2013

Number	Month of Issue	Pages
1	January	1–177
2	March	179–349
3	May	351–524
4	July	525–691
5	September	693–862
6	November	863–1036

Journal of Testing and Evaluation
Subject Index to Volume 41
2013

A

Accelerated life test
White OLED Weibull Life Prediction Using Maximum Likelihood Estimation (Jian-ping Zhang, Jiong-lei Wu, Yu Liu, Helen Wu, Aixi Zhou, and Wen-li Wu), Jan., 76

Accelerated vibration testing
Accelerated Slam Testing of Vehicle Door Plate Module Using Vibration Exciter (Chan-Jung Kim, Bong-Hyun Lee, and Yeon June Kang), Jul., 659

Acceptable quality level
Selection of Modified Lot Sensitive Sampling Inspection Plans for Isolated Lots With Small Acceptance Numbers (R. Vijayaraghavan, A. Loganathan, and D. Rajalakshmi), Sep., 845

Acceptance sampling plan
Decision Procedure for the Weibull Distribution Based on Run Lengths of Conforming Items (Muhammad Aslam, Mohammad Saber Fallah Nezhad, and Muhammad Azam), Sep., 826

Accuracy
Accuracy and Reliability of Personal Breath Alcohol Analyzers (Carolyn L. Bouma, William M. Davis, Mollie R. Blackburn, Jeffrey C. Andrews, Emily Herb, J. Rex Lee, and Neal S. Latman), Nov., 863

Acid treatment
Acid Treatment Technique for Determining the Mortar Content of Recycled Concrete Aggregates (A. Akbarnezhad, K. C. G. Ong, M. H. Zhang, and C. T. Tam), May, 441

Acoustoelasticity
Comparison between Contact and Immersion Method in Ultrasonic Stress Measurement of Welded Stainless Steel Plates (Yashar Javadi, Mehdi Ahmadi Najafabadi, and Mehdi Akhlaghi), Sep., 788

Active zone
Expansive Clay Suction Measurements Using Filter Paper and Polymer-Capacitance Sensor Methods (Landris T. Lee, Jr.), Nov., 905

Additives
Performance Evaluation of Asphalt-Rubber Stone Matrix Asphalt Mixtures with Warm Mix Asphalt Additives (Weidong Cao and Shutang Liu), Jan., 141

Adiposity
Evaluation of Adult Body Adiposity, Size, and Shape by Stereovision Imaging (M. Reese Pepper, Jeanne H. Freeland-Graves, Wurong Yu, Phillip R. Stanforth, and Bugao Xu), Jan., 131

Aggregate
Acid Treatment Technique for Determining the Mortar Content of Recycled Concrete Aggregates (A. Akbarnezhad, K. C. G. Ong, M. H. Zhang, and C. T. Tam), May, 441

Aggregate loss
Calibration of Seal Coat Application Rate Design (Jusang Lee, Hyung Jun Ahn, Todd Shields, Dwayne Harris, and Shuo Li), March, 247

Airfoil section
Aircraft Turbine Engine Manufacturing with Multiple Specifications (S. J. Lin, D. L. Yang, F. T. Cheng, and M. F. Wu), Jan., 32

Ambient vibration
Modal Identification of Different RC Frames Using Experimental Measurements (Mehmet Emin Arslan and Ahmet Durmuş), Nov., 970

Analytic hierarchy process (AHP)
Fuzzy-GIS Approach for Applying the AHP Multi-Criteria Decision-Making Model to Evaluate Real Estate Purchases (Chin-Tsai Lin and Jun-Kun Lin), Nov., 978

Analytic network process
Evaluating Smart Living Technology Strategies Using the Analytic Network Process (Lon-Fon Shieh, Ching-Chiang Yeh, and Ming-Cheng Lai), Nov., 1011

Analytical hierarchy process (AHP)
An Application of AHP and Sensitivity Analysis for Measuring the Best Strategy of Reverse Logistics: A Case Study of Photovoltaic Industry Chain (Chun-Yueh Lin and Yih-Chearng Shiue), May, 386

Anchorage strength
Evaluation of Guy Anchorage Strength in Clay for Transmission Tower (Warat Kongkitkul, Sorawut Srisakorn, Thitapan Chantachot, Sompote Youwai, Pornkasem Jongpradist, and Chaloempon Bunjongruksa), Jul., 564

And surface friction
Effectiveness of Asphalt Rejuvenator (Jusang Lee, Shuo Li, Yongjoo Kim, and Jaejun Lee), May, 433

Anti-cracking agent
Application Research on Anti-Cracking Agent for Semi-Rigid Base (Hui Luo, Hong-Ping Zhu, Jian-Ming Zi, Ying Wang, and Yong-Fa Lu), Jan., 171

Application rate
Calibration of Seal Coat Application Rate Design (Jusang Lee, Hyung Jun Ahn, Todd Shields, Dwayne Harris, and Shuo Li), March, 247

APSO
Time Domain Microwave Imaging of a Buried Homogeneous Dielectric Cylinder in a Slab Medium by Asynchronous Particle Swarm Optimization (Chien-Ching Chiu, Chung-Hsin Huang, Ching-Lieh Li, and Lung-Fai Tuen), May, 417

Asphalt
Evaluation of Asphalt Blended With Low Percentage of Carbon Micro-Fiber and Nanoclay (Hui Yao, Zhanping You, Liang Li, Shu Wei Goh, Julian Mills-Beale, Xianming Shi, and David Wingard), March, 278

Asphalt composites
Nano-Mechanical Characterization of Mastic, Aggregate, and Interfacial Zone in Asphalt Composites (S. Khorasani, E. Masad, E. Kassem, and R. K. Abu Al-Rub), Nov., 924

Asphalt concrete
Exploration of a Performance Test for Emulsion Treated Asphalt Surfaces (Andrew Braham, Isaac L. Howard, and Jason Barham), March, 269
Evaluating Frictional Characteristics of Typical Wearing Course Mixtures in Louisiana (Zhong Wu, Xiaoming Yang, Vivek Lal Das, and Louay N. Mohammad), Jul., 579
Rheological Characterization of Asphalt Concrete Using a Shear Box (Safwat F. Said, Hassan Hakim, and Olle Eriksson), Jul., 602

Asphalt emulsion
Exploration of a Performance Test for Emulsion Treated Asphalt Surfaces

(Andrew Braham, Isaac L. Howard, and Jason Barham), March, 269

Asphalt mixture
Thermal Cracking Potential of High RAP-WMA Evaluated With Bending Beam Rheometer Mixture Beam Test (Jesse D. Doyle and Isaac L. Howard), March, 236
Effect of Temperature and Frequency on Visco-Elastic Dynamic Response of Asphalt Mixture (Peilong Li, Zhan Ding, and Zhengqi Zhang), Jul., 571

Asphalt mixture performance tests
A Re-Look at the Asphalt Mixture Performance Test Protocols and Computational Algorithms (Neethu Roy, A. Veeraragavan, P. K. Jain, and J. Murali Krishnan), Sep., 729

Asphalt mixtures
Rate- and Temperature-Dependent Fracture Characteristics of Asphaltic Paving Mixtures (Soohyok Im, Yong-Rak Kim, and Hoki Ban), March, 257

Asphalt pavement
Development of a Composite Specimen Interface Cracking (CSIC) Test for Top-Down Cracking (Yu Chen, Gabriele Tebaldi, Reynaldo Roque, and George Lopp), Jul., 625

Asphalt rejuvenator
Effectiveness of Asphalt Rejuvenator (Jusang Lee, Shuo Li, Yongjoo Kim, and Jaejun Lee), May, 433

Asphalt-rubber
Performance Evaluation of Asphalt-Rubber Stone Matrix Asphalt Mixtures with Warm Mix Asphalt Additives (Weidong Cao and Shutang Liu), Jan., 141
Rheological Behavior of Asphalt–Rubber Binders Modified With Shale-Oil Residue and Polyphosphoric Acid (Adalberto Leandro Faxina, Ana Paula Furlan, and Glauco Tulio Pessa Fabbri), Sep., 719

ASTM D1238
Understanding Melt Index and ASTM D1238 (A. M. Mertz, A. W. Mix, H. M. Baek, and A. J. Giacomin), Jan., 50

ASTM D1596
Statistical Analysis of the Stress-Energy Methodology Applied to Cushion Curve Determination (Kendalyn Paulin, Gregory Batt, and Matthew Daum), May, 409
Application of the Stress-Energy Method for Generating Corrugated Board Cushion Curves (Matthew Daum, Duncan Darby, Gregory Batt, and Lisi Campbell), Jul., 590

ASTM D4684
Advances in the Understanding of Gelation in the Framework of the Test ASTM D5133 (J. A. Maroto-Centeno, T. Pérez-Gutiérrez, and M. Quesada-Pérez), March, 305

ASTM D5133
Advances in the Understanding of Gelation in the Framework of the Test ASTM D5133 (J. A. Maroto-Centeno, T. Pérez-Gutiérrez, and M. Quesada-Pérez), March, 305

ASTM E1820
A Numerical Study on Effective Modulus of Elasticity in Crack Length Evaluation for Single-Edge Bending Specimens (Enyang Wang, Wenxing Zhou, and Guowu Shen), Sep., 770

ASTM E2218-02
Detailed Investigation of Forming Limit Determination Standards for Aluminum Alloys (Murat Dilmec, H. Selcuk Halkaci, Fahrettin Ozturk, and Mevlut Turkoz), Jan., 10

Athlete-to-surface interaction
A New Device for Simulating Athlete-to-Surface Interactions on Natural and Synthetic Turf (Adam W. Thoms, James T. Brosnan, Max R. Paquette, Songning Zhang, and John C. Sorochan), May, 497

Automated grid method
Measuring Mechanical Properties of the 3D Carbon/Carbon Composite Using Automated Grid Method (Xiaofeng Li, Zhongwei Zhang, Lijun Qin, Xiaoguang Yang, Zhihai Feng, Yang Wang, Hong Miao, Linghui He, and Xinglong Gong), Jan., 81

B

Backpropagation network
Corporate Performance Forecasting Using Hybrid Rough Set Theory, Neural Networks, and DEA (Chiun-Sin Lin, Tzu-Yu Lin, and Sheng-Hsiung Chiu), May, 359

Balance of power
Measuring Principles of a Thrust Flow Transducer and Its Applications in River Flow Velocity (Xiao-min Chang, Xiao-yan Zhang, and Jian-min Qin), Nov., 894

Ballasted roller
Evaluation of a Cryogenic Sprayer Using Liquid Nitrogen and a Ballasted Roller for Weed Control (Matthew A. Cutulle, Gregory R. Armel, James T. Brosnan, Dean A. Kopsell, William E. Hart, J. Javier Vargas, Lori A. Gibson, Rebecca E. Messer, Alex J. McLemore, and H. Adam Duncan), Nov., 869

Barites powder (B)
In Situ Observation and Model Test on Zonal Disintegration in Deep Tunnels (Xu-Guang Chen, Qiang-Yong Zhang, Yuan Wang, Shu-Cai Li, and Han-Peng Wang), Nov., 990

Base course
Engineering Properties of Prime Coats Applied to a Granular Base (Gouri Mohan, Yetkin Yildirim, Kenneth H. Stokoe, II, and Mustafa B. Erten), Sep., 713

Beam-support design
Analysis of Support Apparatus for Flexural Load-Deflection Testing: Minimizing Bias Caused by Arching Forces (Ronald F. Zollo), Jan., 63

Bending beam rheometer
Exploration of a Performance Test for Emulsion Treated Asphalt Surfaces (Andrew Braham, Isaac L. Howard, and Jason Barham), March, 269

Bending test
Stress-Relaxation Cracking Test for Welded Joints (B. Kuhn, C. Ullrich, H. Tschaffon, T. Beck, and L. Singheiser), March, 207

Benefits
An Application of AHP and Sensitivity Analysis for Measuring the Best Strategy of Reverse Logistics: A Case Study of Photovoltaic Industry Chain (Chun-Yueh Lin and Yih-Chearng Shiue), May, 386

Binomial distribution
Evaluation of Single Sampling Plans by Attributes Using Mixture of Two Distributions (A. Loganathan, P. Muthu Krishnan, R. Vijayaraghavan, and M. Saral), Jul., 675

Biomedical engineering
Evaluation of Adult Body Adiposity, Size, and Shape by Stereovision Imaging (M. Reese Pepper, Jeanne H. Freeland-Graves, Wurong Yu, Phillip R. Stanforth, and Bugao Xu), Jan., 131

Bird-Carreau model
Understanding Melt Index and ASTM D1238 (A. M. Mertz, A. W. Mix, H. M. Baek, and A. J. Giacomin), Jan., 50

Blade inspection
Aircraft Turbine Engine Manufacturing with Multiple Specifications (S. J. Lin, D. L. Yang, F. T. Cheng, and M. F. Wu), Jan., 32

Blood alcohol concentration
Accuracy and Reliability of Personal Breath Alcohol Analyzers (Carolyn L. Bouma, William M. Davis, Mollie R. Blackburn, Jeffrey C. Andrews, Emily Herb, J. Rex Lee, and Neal S. Latman), Nov., 863

Body composition
Evaluation of Adult Body Adiposity, Size, and Shape by Stereovision Imaging (M. Reese Pepper, Jeanne H. Freeland-Graves, Wurong Yu, Phillip R. Stanforth, and Bugao Xu), Jan., 131

Breath alcohol analyzer
Accuracy and Reliability of Personal Breath Alcohol Analyzers (Carolyn L. Bouma, William M. Davis, Mollie R. Blackburn, Jeffrey C. Andrews, Emily Herb, J. Rex Lee, and Neal S. Latman), Nov., 863

Brittleness
Inhomogeneous Micro-Structure Influence on Macro-Crack of Sandstone (Yunliang Tan, Yanchun Yin, and Dongmei Huang), Nov., 1024

Building settlement
Monitoring of Vertical Movement in a Four-Story Wood-Frame Building in Coastal British Columbia (Jieying Wang, Chun Ni, and Gamal Mustapha), Jul., 611

Bulkers
Applying Hybrid Grey Models in Analyzing Tonnage Growth Trends in Bulk Shipping Among China, Hong Kong, and Taiwan (Cheng-Chi Chung), May, 374

Bunch/leaf ratio
Impact of Leaf/Bunch Ratio and Time of Application on Yield and Fruit Quality of Barhi Date Palm Trees (*Phoenix dactylifera* L.) Under Saudi Arabian Conditions (Alaa El-Din K. Omar, S. S. Soliman, and M. A. Ahmed), Sep., 813

Burr type X distribution
Two-Stage Group Acceptance Sampling Plan for Burr Type X Percentiles (Muhammad Aslam, Muhammad Azam, Y. L. Lio, and Chi-Hyuck Jun), Jul., 525

C

Camera pixel
Improved Digital Image Correlation Method for Eliminating Pixel Shape-Induced Errors in Shear-Strain Calculations (Bei Peng, Chengcheng Huang, Wu Zhou, Huijun Yu, and Zhi Zeng), March, 231

Capability assessment
Aircraft Turbine Engine Manufacturing with Multiple Specifications (S. J. Lin, D. L. Yang, F. T. Cheng, and M. F. Wu), Jan., 32

Carbon/carbon composites
Measuring Mechanical Properties of the 3D Carbon/Carbon Composite Using Automated Grid Method (Xiaofeng Li, Zhongwei Zhang, Lijun Qin, Xiaoguang Yang, Zhihai Feng, Yang Wang, Hong Miao, Linghui He, and Xinglong Gong), Jan., 81

Carboxyl modification
Carboxyl Modification of Sugarcane Bagasse Hemicelluloses With Succinic Anhydride in Aqueous Solution (Lijun Wang, Xinliang Liu, Mengling Weng, Fusheng Wu, Zhoujun Li, and Shuangfei Wang), May, 517

Case-based reasoning
CBR-Based Fuzzy Support Vector Machine for Financial Distress Prediction (Yu Cao and Xiaohong Chen), Sep., 833

CBR-based fuzzy SVM
CBR-Based Fuzzy Support Vector Machine for Financial Distress Prediction (Yu Cao and Xiaohong Chen), Sep., 833

Cement ellipsoid
Particle Breakage of Cement Ellipsoid Aggregate—Part II: Investigation of Particle Crushing (Bing-yin Zhang, Yu-xin Jie, and De-zhi Kong), Sep., 761

Cement heat of hydration
Measurement and Prediction of Heat of Hydration of Portland Cement Using Isothermal Conduction Calorimetry (Ahmadreza Sedaghat, A. Zayed, and Paul Sandberg), Nov., 943

Cemented carbides
An Experimental Device for Material Characterization of Powder Materials (Per Lindskog, Daniel C. Andersson, and Per-Lennart Larsson), May, 504

Centrifuge model test
Centrifuge Model Test Study of Static and Cyclic Behavior of a Pile Foundation for an Offshore Wind Generator (Ga Zhang, Bing Rong, and Ping Fu), Sep., 701

CFRP
The Damage Investigation of Wedge-Shaped Electromagnetic Riveting Structure of CFRP/Aluminium Alloy (Shengwang Liu, Weifang Zhang, Yufeng Wu, and Yu Chen), March, 188

Characterization
Carboxyl Modification of Sugarcane Bagasse Hemicelluloses With Succinic Anhydride in Aqueous Solution (Lijun Wang, Xinliang Liu, Mengling Weng, Fusheng Wu, Zhoujun Li, and Shuangfei Wang), May, 517

Chinese listed company
CBR-Based Fuzzy Support Vector Machine for Financial Distress Prediction (Yu Cao and Xiaohong Chen), Sep., 833

Chip seal
Use of Sweep Test for Emulsion and Hot Asphalt Chip Seals: Laboratory and Field Evaluation (Nazimuddin M. Wasiuddin, Amanda Marshall, Nibert E. Saltibus, Aziz Saber, Christopher Abadie, and Louay N. Mohammad), March, 289

Coating thickness measurement
A Non-Destructive Evaluation Strategy for Thick Coating Evaluation on Hemispherical Steel Shells of Different Sizes with a Wide-Range ECT Sensor (Dongli Zhang, Zhaoba Wang, Zhenmao Chen, and Yong Li), Jul., 551

Coding scheme
Design and Evaluation of Low-Latency and Shortest-Path Routing Algorithm for Triplet-Based Hierarchical Interconnection Network (Yang Zhang and Feng Shi), Jul., 541

Cohesive zone
Rate- and Temperature-Dependent Fracture Characteristics of Asphaltic Paving Mixtures (Soohyok Im, Yong-Rak Kim, and Hoki Ban), March, 257

Collecting strategy
An Application of AHP and Sensitivity Analysis for Measuring the Best Strategy of Reverse Logistics: A Case Study of Photovoltaic Industry Chain (Chun-Yueh Lin and Yih-Chearng Shiue), May, 386

Comparator
Comparator With Optical Encoder System for the Calibration of Leveling Staffs (Aleš Marjetič and Dušan Kogoj), Sep., 818

Complex modulus
Method for Dynamic Material Property Characterization of Soft-Tissue-Mimicking Isotropic Viscoelastic Materials Using Fractional Damping Models (Bryn A. Martin, Umit Kutluay, and Yigit Yazicioglu), Sep., 804

Complex shear modulus
Evaluation of Asphalt Blended With Low Percentage of Carbon Micro-Fiber and Nanoclay (Hui Yao, Zhanping You, Liang Li, Shu Wei Goh, Julian Mills-Beale, Xianming Shi, and David Wingard), March, 278
Toward Development of a New Thermal Cracking Test Using the Dynamic Shear Rheometer (Haifang Wen and Sushanta Bhusal), May, 425

Compliance equation
A Study on the Fitting Accuracy of CMOD Compliance Equations (Enyang Wang, Wenxing Zhou, and Guowu Shen), March, 347
A Numerical Study on Effective Modulus of Elasticity in Crack Length Evaluation for Single-Edge Bending Specimens (Enyang Wang, Wenxing Zhou, and Guowu Shen), Sep., 770

Composite specimen
Development of a Composite Specimen Interface Cracking (CSIC) Test for Top-Down Cracking (Yu Chen, Gabriele Tebaldi, Reynaldo Roque, and George Lopp), Jul., 625

Compression
Monitoring of Vertical Movement in a Four-Story Wood-Frame Building in Coastal British Columbia (Jieying Wang, Chun Ni, and Gamal Mustapha), Jul., 611

Compressive strength
Compressive Behavior of Square-Cell Titanium Honeycomb (Ryan Parsons, Elizabeth Frink, Kevin Lease, and Suzanne Dubnicka), March, 179
Portland Cement Hydration by Electrical Resistivity Method and Computer Simulation (Yibing Zuo and Xiaosheng Wei), May, 451

Computer simulation
Portland Cement Hydration by Electrical Resistivity Method and Computer Simulation (Yibing Zuo and Xiaosheng Wei), May, 451

Concentration effect
Concentration Effect on Photoluminescence Tests of the CdSe Colloid Nanocrystal System (Zhonghai Lin, Zhilin Zhu, Minqiang Wang, Guangfen Wei, Huiqiu Du, Pinjian Wang, Yanwu Liu, and Zhi Yang), Nov., 890

Concrete
Acid Treatment Technique for Determining the Mortar Content of Recycled Concrete Aggregates (A. Akbarnezhad, K. C. G. Ong, M. H. Zhang, and C. T. Tam), May, 441

Concrete creep
Shrinkage and Creep of Steel Fiber Reinforced Normal Strength Concrete (Drago Saje, Branko Bandelj, Jakob Sušteršič, Jože Lopatič, and Franc Saje), Nov., 959

Concrete shrinkage
Shrinkage and Creep of Steel Fiber Reinforced Normal Strength Concrete (Drago Saje, Branko Bandelj, Jakob Sušteršič, Jože Lopatič, and Franc Saje), Nov., 959

Condensation
Experimental Testing and Evaluation of Parameters on the Extraction of Water from Air Using Thermoelectric Coolers (F. L. Tan and S. C. Fok), Jan., 96

Conducting alloys
Functionally Graded Bronze/Tungsten-Carbide Castings: A Characterization and Property Study (Lloyd Brown and Peter Joyce), Jan., 22

Conductivity
Functionally Graded Bronze/Tungsten-Carbide Castings: A Characterization and Property Study (Lloyd Brown and Peter Joyce), Jan., 22

Constitutive modeling
Impedance Spectroscopy Characterization of a Piezoresistive Structural Polymer Composite Bulk Sensor (C. Vipulanandan and P. Prashanth), Nov., 898

Consumer's risk
Multiple Dependent State Sampling Plan Based on Process Capability Index (Muhammad Aslam, Muhammad Azam, and Chi-Hyuck Jun), March, 340

Contact ultrasonic stress measurement
Comparison between Contact and Immersion Method in Ultrasonic Stress Measurement of Welded Stainless Steel Plates (Yashar Javadi, Mehdi Ahmadi Najafabadi, and Mehdi Akhlaghi), Sep., 788

Continuous construction of the base and asphalt pavement
Application Research on Anti-Cracking Agent for Semi-Rigid Base (Hui Luo, Hong-Ping Zhu, Jian-Ming Zi, Ying Wang, and Yong-Fa Lu), Jan., 171

Convention
Evaluating Convention Destination Images in Australia and Asia (Chin-Tsai Lin and Chiu-Wen Lin), Sep., 851

Corotational Maxwell model
Understanding Melt Index and ASTM D1238 (A. M. Mertz, A. W. Mix, H. M. Baek, and A. J. Giacomin), Jan., 50

Corporate governance
Corporate Performance Forecasting Using Hybrid Rough Set Theory, Neural Networks, and DEA (Chiun-Sin Lin, Tzu-Yu Lin, and Sheng-Hsiung Chiu), May, 359

Corrosion
Failure Analysis of a Set of Flapper Valves Under ALT With Alternative Test Device (J. A. Martins, I. Ferreira, D. Leite, and E. C. Romão), March, 324

Corrugated board
Application of the Stress-Energy Method for Generating Corrugated Board Cushion Curves (Matthew Daum, Duncan Darby, Gregory Batt, and Lisi Campbell), Jul., 590

Costs and risks (BOCR)
An Application of AHP and Sensitivity Analysis for Measuring the Best Strategy of Reverse Logistics: A Case Study of Photovoltaic Industry Chain (Chun-Yueh Lin and Yih-Chearng Shiue), May, 386

Crack fronts
A Method to Obtain Straight Crack Fronts During Pre-Cracking of Compact Tension Specimens (Martin Öberg), Sep., 858

Crack image
Fatigue Analysis of Asphalt Concrete under Indirect Tensile Mode of Loading Using Crack Images (Manh Tuan Nguyen, Hyun Jong Lee, and Jongeun Baek), Jan., 148

Crack length measurement
A Numerical Study on Effective Modulus of Elasticity in Crack Length Evaluation for Single-Edge Bending Specimens (Enyang Wang, Wenxing Zhou, and Guowu Shen), Sep., 770

Cracking
Effect of Binder Type, Mastic, and Aggregate Type on the Low-Temperature Characteristics of Modified Hot Mix Asphalt (Walaa S. Mogawer, Alexander J. Austerman, and Sang-Soo Kim), Nov., 914

Creep
Monitoring of Vertical Movement in a Four-Story Wood-Frame Building in Coastal British Columbia (Jieying Wang, Chun Ni, and Gamal Mustapha), Jul., 611

Critical response
Accelerated Slam Testing of Vehicle Door Plate Module Using Vibration Exciter (Chan-Jung Kim, Bong-Hyun Lee, and Yeon June Kang), Jul., 659

Critical stress-intensity factor
Effect of Steel Fibers and Thermal Cycles on Fracture Properties of Ultra-High-Performance Concrete (Ibrahim Hakeem, Abul K. Azad, and Shamsad Ahmad), May, 458

Critical value
Supplier Selection for Processes with Multiple Characteristics Based on Testing Capability Index C_{pk} (W. L. Pearn and C. H. Wu), Jul., 534

Cryogenic
Evaluation of a Cryogenic Sprayer Using Liquid Nitrogen and a Ballasted Roller for Weed Control (Matthew A. Cutulle, Gregory R. Armel, James T. Brosnan, Dean A. Kopsell, William E. Hart, J. Javier Vargas, Lori A. Gibson, Rebecca E. Messer, Alex J. McLemore, and H. Adam Duncan), Nov., 869

CT-specimen
A Method to Obtain Straight Crack Fronts During Pre-Cracking of Compact Tension Specimens (Martin Öberg), Sep., 858

Curtain wall
Pressure Distribution of Dynamic Water Penetration Tests for Curtain Walls (Tai-Kuang Lee, Chien-Yuan Kuo, Austin D. E. Pan, and Yi-Chao Li), May, 471

Curved steel base
A Non-Destructive Evaluation Strategy for Thick Coating Evaluation on Hemispherical Steel Shells of Different Sizes with a Wide-Range ECT Sensor (Dongli Zhang, Zhaoba Wang, Zhenmao Chen, and Yong Li), Jul., 551

Cushion curve
Application of the Stress-Energy Method for Generating Corrugated Board Cushion Curves (Matthew Daum, Duncan Darby, Gregory Batt, and Lisi Campbell), Jul., 590

Cushion curves
Statistical Analysis of the Stress-Energy Methodology Applied to Cushion Curve Determination (Kendalyn Paulin, Gregory Batt, and Matthew Daum), May, 409

Cutback
Engineering Properties of Prime Coats Applied to a Granular Base (Gouri Mohan, Yetkin Yildirim, Kenneth H. Stokoe, II, and Mustafa B. Erten), Sep., 713

D

Damage
A Study on the Residual Fatigue Strain and Damage of Steel Fiber Reinforced Recycled Concrete Under Constant Amplitude Flexural Fatigue Loading (Yang Runnian and Wei Demin), May, 465

Damage detection
Feature Assimilation for Vibration Based Damage Detection (Saurabh Prabhu and Sez Atamturktur), Jan., 39

Damage mechanism
The Damage Investigation of Wedge-Shaped Electromagnetic Riveting Structure

of CFRP/Aluminium Alloy (Shengwang Liu, Weifang Zhang, Yufeng Wu, and Yu Chen), March, 188

Data envelopment analysis
Corporate Performance Forecasting Using Hybrid Rough Set Theory, Neural Networks, and DEA (Chiun-Sin Lin, Tzu-Yu Lin, and Sheng-Hsiung Chiu), May, 359

Date palm
Impact of Leaf/Bunch Ratio and Time of Application on Yield and Fruit Quality of Barhi Date Palm Trees (*Phoenix dactylifera* L.) Under Saudi Arabian Conditions (Alaa El-Din K. Omar, S. S. Soliman, and M. A. Ahmed), Sep., 813

Deadweight tonnages
Applying Hybrid Grey Models in Analyzing Tonnage Growth Trends in Bulk Shipping Among China, Hong Kong, and Taiwan (Cheng-Chi Chung), May, 374

Decision-making
An Evaluation Model Using Fuzzy TOPSIS and Goal Programming for TQM Consultant Selection (Chin-Nung Liao), Jan., 122

Deformation modulus of elasticity (Edef)
In Situ Observation and Model Test on Zonal Disintegration in Deep Tunnels (Xu-Guang Chen, Qiang-Yong Zhang, Yuan Wang, Shu-Cai Li, and Han-Peng Wang), Nov., 990

Delamination
Investigation of Delamination on I-65 in Indiana (Jusang Lee, Hyungjun Ahn, Ayesha Shah, and Kurt Sommer), Sep., 745

Delay and sum
A Study of Total Focusing Method for Ultrasonic Nondestructive Testing (Po-Yen Tseng, Young-Fo Chang, Chao-Ming Lin, Wei-Jen Nien, Chih-Hsiung Chang, and Chih-Chung Huang), Jul., 557

Destination image
Evaluating Convention Destination Images in Australia and Asia (Chin-Tsai Lin and Chiu-Wen Lin), Sep., 851

Detection
The Damage Investigation of Wedge-Shaped Electromagnetic Riveting Structure of CFRP/Aluminium Alloy (Shengwang Liu, Weifang Zhang, Yufeng Wu, and Yu Chen), March, 188

Dew point
Experimental Testing and Evaluation of Parameters on the Extraction of Water from Air Using Thermoelectric Coolers (F. L. Tan and S. C. Fok), Jan., 96

Digital image correlation
Improved Digital Image Correlation Method for Eliminating Pixel Shape-Induced Errors in Shear-Strain Calculations (Bei Peng, Chengcheng Huang, Wu Zhou, Huijun Yu, and Zhi Zeng), March, 231

Digital level
Comparator With Optical Encoder System for the Calibration of Leveling Staffs (Aleš Marjetič and Dušan Kogoj), Sep., 818

Diopter
Study on Glass Defect Inspection Based on Projecting Grating Method (Yong Jin, Zhaoba Wang, Linquan Zhu, Jiliang Yang, and Bo Wei), March, 332

Direct search method
Analysis of the Machine Repair Models With Multi-Threshold Synchronous Vacations (Chia-Huang Wu, Jau-Chuan Ke, and Gautam Choudhury), May, 366

Dislocations
Stress State of GaN Epilayer Grown on Sapphire and 6H-SiC Substrates (Kexiong Zhang, Hongwei Liang, Shiwei Song, Dechao Yang, Rensheng Shen, Yang Liu, Xiaochuan Xia, Yingmin Luo, and Guotong Du), Sep., 798

Dissipated energy
Fatigue Analysis of Asphalt Concrete under Indirect Tensile Mode of Loading Using Crack Images (Manh Tuan Nguyen, Hyun Jong Lee, and Jongeun Baek), Jan., 148

Dry rubber content
Determination of Dry Rubber Content in Natural Rubber Latex Based on Wavelet-Domain Fluorescence Image (Lin Zhang, Zhimin Zhao, Yuyu Ji, and Lei Ji), Jul., 667

Dry wheel tracker
A Re-Look at the Asphalt Mixture Performance Test Protocols and Computational Algorithms (Neethu Roy, A. Veeraragavan, P. K. Jain, and J. Murali Krishnan), Sep., 729

Ductility
Stress-Relaxation Cracking Test for Welded Joints (B. Kuhn, C. Ullrich, H. Tschaffon, T. Beck, and L. Singheiser), March, 207

Dynamic characteristics
Modal Identification of Different RC Frames Using Experimental Measurements (Mehmet Emin Arslan and Ahmet Durmuş), Nov., 970

Dynamic modulus
Behavior of Selected Warm Mix Asphalt Additive Modified Binders and Prediction of Dynamic Modulus of the Mixes (Zahid Hossain and Musharraf Zaman), Jan., 159
A Laboratory Study to Predict the Rutting and Fatigue Behavior of Asphalt Concrete Using the Indirect Tensile Test (Haifang Wen and Sushanta Bhusal), March, 299
Effect of Temperature and Frequency on Visco-Elastic Dynamic Response of Asphalt Mixture (Peilong Li, Zhan Ding, and Zhengqi Zhang), Jul., 571
A Re-Look at the Asphalt Mixture Performance Test Protocols and Computational Algorithms (Neethu Roy, A. Veeraragavan, P. K. Jain, and J. Murali Krishnan), Sep., 729

Dynamic pressures
Pressure Distribution of Dynamic Water Penetration Tests for Curtain Walls (Tai-Kuang Lee, Chien-Yuan Kuo, Austin D. E. Pan, and Yi-Chao Li), May, 471

Dynamic shear rheometer
Toward Development of a New Thermal Cracking Test Using the Dynamic Shear Rheometer (Haifang Wen and Sushanta Bhusal), May, 425

E

E1820
A Study on the Fitting Accuracy of CMOD Compliance Equations (Enyang Wang, Wenxing Zhou, and Guowu Shen), March, 347

Eddy current testing technology
A Non-Destructive Evaluation Strategy for Thick Coating Evaluation on Hemispherical Steel Shells of Different Sizes with a Wide-Range ECT Sensor (Dongli Zhang, Zhaoba Wang, Zhenmao Chen, and Yong Li), Jul., 551

EFDD
Modal Identification of Different RC Frames Using Experimental Measurements (Mehmet Emin Arslan and Ahmet Durmuş), Nov., 970

Effective modulus
A Numerical Study on Effective Modulus of Elasticity in Crack Length Evaluation for Single-Edge Bending Specimens (Enyang Wang, Wenxing Zhou, and Guowu Shen), Sep., 770

Effective thermal conductivity
Evaluation of Effective Thermal Conductivity for Mineral Cast Structural Materials Using Steady-State and Transient Methods (A. Selvakumar and P. V. Mohanram), Jul., 685

Electrical discharge machining
Effect of Electrical Discharge Machining (EDM) on Charpy Test Results from Miniaturized Steel Specimens (Enrico Lucon), Jan., 1

Electrical resistivity
Portland Cement Hydration by Electrical Resistivity Method and Computer Simulation (Yibing Zuo and Xiaosheng Wei), May, 451

Electromagnetic riveting (EMR)
The Damage Investigation of Wedge-Shaped Electromagnetic Riveting Structure of CFRP/Aluminium Alloy (Shengwang

Liu, Weifang Zhang, Yufeng Wu, and Yu Chen), March, 188

Empirical mode decomposition
A Hybrid Model by Empirical Mode Decomposition and Support Vector Regression for Tourist Arrivals Forecasting (Ming-Cheng Lai, Ching-Chiang Yeh, and Lon-Fon Shieh), May, 351

Emulsion
Use of Sweep Test for Emulsion and Hot Asphalt Chip Seals: Laboratory and Field Evaluation (Nazimuddin M. Wasiuddin, Amanda Marshall, Nibert E. Saltibus, Aziz Saber, Christopher Abadie, and Louay N. Mohammad), March, 289
Engineering Properties of Prime Coats Applied to a Granular Base (Gouri Mohan, Yetkin Yildirim, Kenneth H. Stokoe, II, and Mustafa B. Erten), Sep., 713

Energy
Effect of Working Parameters on Excavation Rate and Specific Energy on Surface Treatment With Pure Water Jet (Yilmaz Ozcelik, Raimondo Ciccu, and Augusto Bortolussi), Jan., 104

Epoxy-granite
Evaluation of Effective Thermal Conductivity for Minerai Cast Structural Materials Using Steady-State and Transient Methods (A. Selvakumar and P. V. Mohanram), Jul., 685

Equipment correction factor
Calibration of Seal Coat Application Rate Design (Jusang Lee, Hyung Jun Ahn, Todd Shields, Dwayne Harris, and Shuo Li), March, 247

Equivalent contact radius
A Solution for Estimating the Tensile Yield Strength From Small Specimens (Jonathan Mak, Tao Wei, Richard Wuhrer, Wing Yeung, Greg Heness, and Zhang Di), Jul., 647

Ergonomic properties of gloves
Preliminary Evaluation of the Ergonomic Properties of Gloves for Protection Against Mineral Oils Based on Manual Dexterity Tests (Sylwia Krzemińska and Emilia Irzmańska), Nov., 875

Ergonomic tests of gloves
Preliminary Evaluation of the Ergonomic Properties of Gloves for Protection Against Mineral Oils Based on Manual Dexterity Tests (Sylwia Krzemińska and Emilia Irzmańska), Nov., 875

Estimation variability of modal parameters
Variability of Modal Parameter Estimations Using Two Different Output-Only System Identification Methods (Ozgur Ozcelik and Mohammad Salavati), Nov., 1001

Ethanol dry gas calibration
Accuracy and Reliability of Personal Breath Alcohol Analyzers (Carolyn L. Bouma, William M. Davis, Mollie R. Blackburn, Jeffrey C. Andrews, Emily Herb, J. Rex Lee, and Neal S. Latman), Nov., 863

Experimental characterization
Compressive Behavior of Square-Cell Titanium Honeycomb (Ryan Parsons, Elizabeth Frink, Kevin Lease, and Suzanne Dubnicka), March, 179

Experimental device
An Experimental Device for Material Characterization of Powder Materials (Per Lindskog, Daniel C. Andersson, and Per-Lennart Larsson), May, 504

Experimental measurement
Measurement and Evaluation of the Thermal Expansion Coefficient of Rock-Filled Concrete (Jin-Ting Wang, Shuo Wang, and Feng Jin), Nov., 951

Extraction of water from air (EWA)
Experimental Testing and Evaluation of Parameters on the Extraction of Water from Air Using Thermoelectric Coolers (F. L. Tan and S. C. Fok), Jan., 96

F

Failure
Detailed Investigation of Forming Limit Determination Standards for Aluminum Alloys (Murat Dilmec, H. Selcuk Halkaci, Fahrettin Ozturk, and Mevlut Turkoz), Jan., 10

Failure mode
Accelerated Slam Testing of Vehicle Door Plate Module Using Vibration Exciter (Chan-Jung Kim, Bong-Hyun Lee, and Yeon June Kang), Jul., 659

Failure strain
Toward Development of a New Thermal Cracking Test Using the Dynamic Shear Rheometer (Haifang Wen and Sushanta Bhusal), May, 425

Failure stress
Toward Development of a New Thermal Cracking Test Using the Dynamic Shear Rheometer (Haifang Wen and Sushanta Bhusal), May, 425

Fat mass
Evaluation of Adult Body Adiposity, Size, and Shape by Stereovision Imaging (M. Reese Pepper, Jeanne H. Freeland-Graves, Wurong Yu, Phillip R. Stanforth, and Bugao Xu), Jan., 131

Fatigue
Failure Analysis of a Set of Flapper Valves Under ALT With Alternative Test Device (J. A. Martins, I. Ferreira, D. Leite, and E. C. Romão), March, 324
A Study on the Residual Fatigue Strain and Damage of Steel Fiber Reinforced Recycled Concrete Under Constant Amplitude Flexural Fatigue Loading (Yang Runnian and Wei Demin), May, 465

Fatigue crack growth
Method for Assessing Applicability of an Artificial Flaw as a Small Initial Crack for Fatigue Limit Evaluation and Its Application to a Drill Hole and an FIB Processed Sharp Notch in Annealed 0.45% Carbon Steel (Junji Sakamoto, Yoshimasa Takahashi, Yuuta Aono, and Hiroshi Noguchi), March, 194

Fatigue criterion
Fatigue Analysis of Asphalt Concrete under Indirect Tensile Mode of Loading Using Crack Images (Manh Tuan Nguyen, Hyun Jong Lee, and Jongeun Baek), Jan., 148

Fatigue limit
Method for Assessing Applicability of an Artificial Flaw as a Small Initial Crack for Fatigue Limit Evaluation and Its Application to a Drill Hole and an FIB Processed Sharp Notch in Annealed 0.45% Carbon Steel (Junji Sakamoto, Yoshimasa Takahashi, Yuuta Aono, and Hiroshi Noguchi), March, 194

FDTD
Time Domain Microwave Imaging of a Buried Homogeneous Dielectric Cylinder in a Slab Medium by Asynchronous Particle Swarm Optimization (Chien-Ching Chiu, Chung-Hsin Huang, Ching-Lieh Li, and Lung-Fai Tuen), May, 417

Feature extraction
Feature Assimilation for Vibration Based Damage Detection (Saurabh Prabhu and Sez Atamturktur), Jan., 39

Feature fusion
Feature Assimilation for Vibration Based Damage Detection (Saurabh Prabhu and Sez Atamturktur), Jan., 39

Fenton oxidation
Treatment of Landfill Leachate by Microwave-Fenton Oxidation Process Catalyzed by Fe^{2+} Loaded on GAC (Zhan Ding and Weisheng Guan), Sep., 693

Fiber reinforced concrete
Analysis of Support Apparatus for Flexural Load-Deflection Testing: Minimizing Bias Caused by Arching Forces (Ronald F. Zollo), Jan., 63
Loading Rate Concerns in ASTM C1609 (N. Banthia and S. T. Islam), Nov., 1032

Field testing
Evaluation of Guy Anchorage Strength in Clay for Transmission Tower (Warat Kongkitkul, Sorawut Srisakorn, Thitapan Chantachot, Sompote Youwai, Pornkasem Jongpradist, and Chaloempon Bunjongruksa), Jul., 564

Financial distress prediction
CBR-Based Fuzzy Support Vector

Machine for Financial Distress Prediction (Yu Cao and Xiaohong Chen), Sep., 833

Fingerprint
Implementation and Use of Feasibility Assessment of Biometric Locker System for Swimmers (Yun-Long Lay, Hui-Jen Yang, Chern-Sheng Lin, and Chung-Ho Tsai), Nov., 883

Finite-element analysis
Validating Computational Models from Laser Scanning Data for Historic Facades (Linh Truong-Hong and Debra F. Laefer), May, 481

Finite-element welding simulation
Comparison between Contact and Immersion Method in Ultrasonic Stress Measurement of Welded Stainless Steel Plates (Yashar Javadi, Mehdi Ahmadi Najafabadi, and Mehdi Akhlaghi), Sep., 788

Fitting accuracy
A Study on the Fitting Accuracy of CMOD Compliance Equations (Enyang Wang, Wenxing Zhou, and Guowu Shen), March, 347

Flexible pavements
Thermal Cracking Potential of High RAP-WMA Evaluated With Bending Beam Rheometer Mixture Beam Test (Jesse D. Doyle and Isaac L. Howard), March, 236

Flexural arching
Analysis of Support Apparatus for Flexural Load-Deflection Testing: Minimizing Bias Caused by Arching Forces (Ronald F. Zollo), Jan., 63

Flexural test bias
Analysis of Support Apparatus for Flexural Load-Deflection Testing: Minimizing Bias Caused by Arching Forces (Ronald F. Zollo), Jan., 63

Flexural testing
Analysis of Support Apparatus for Flexural Load-Deflection Testing: Minimizing Bias Caused by Arching Forces (Ronald F. Zollo), Jan., 63

Floating ball
Measuring Principles of a Thrust Flow Transducer and Its Applications in River Flow Velocity (Xiao-min Chang, Xiao-yan Zhang, and Jian-min Qin), Nov., 894

Flow number
A Laboratory Study to Predict the Rutting and Fatigue Behavior of Asphalt Concrete Using the Indirect Tensile Test (Haifang Wen and Sushanta Bhusal), March, 299
A Re-Look at the Asphalt Mixture Performance Test Protocols and Computational Algorithms (Neethu Roy, A. Veeraragavan, P. K. Jain, and J. Murali Krishnan), Sep., 729

Flow time
A Laboratory Study to Predict the Rutting and Fatigue Behavior of Asphalt Concrete Using the Indirect Tensile Test (Haifang Wen and Sushanta Bhusal), March, 299
A Re-Look at the Asphalt Mixture Performance Test Protocols and Computational Algorithms (Neethu Roy, A. Veeraragavan, P. K. Jain, and J. Murali Krishnan), Sep., 729

Flow transducer
Measuring Principles of a Thrust Flow Transducer and Its Applications in River Flow Velocity (Xiao-min Chang, Xiao-yan Zhang, and Jian-min Qin), Nov., 894

Fluorescence imaging
Determination of Dry Rubber Content in Natural Rubber Latex Based on Wavelet-Domain Fluorescence Image (Lin Zhang, Zhimin Zhao, Yuyu Ji, and Lei Ji), Jul., 667

Focused ion beam
Method for Assessing Applicability of an Artificial Flaw as a Small Initial Crack for Fatigue Limit Evaluation and Its Application to a Drill Hole and an FIB Processed Sharp Notch in Annealed 0.45% Carbon Steel (Junji Sakamoto, Yoshimasa Takahashi, Yuuta Aono, and Hiroshi Noguchi), March, 194

Forming limit curve
Detailed Investigation of Forming Limit Determination Standards for Aluminum Alloys (Murat Dilmec, H. Selcuk Halkaci, Fahrettin Ozturk, and Mevlut Turkoz), Jan., 10

Foundation settlement
Validating Computational Models from Laser Scanning Data for Historic Facades (Linh Truong-Hong and Debra F. Laefer), May, 481

Fractal dimension
Inhomogeneous Micro-Structure Influence on Macro-Crack of Sandstone (Yunliang Tan, Yanchun Yin, and Dongmei Huang), Nov., 1024

Fractional damping
Method for Dynamic Material Property Characterization of Soft-Tissue-Mimicking Isotropic Viscoelastic Materials Using Fractional Damping Models (Bryn A. Martin, Umit Kutluay, and Yigit Yazicioglu), Sep., 804

Fracture
Stress-Relaxation Cracking Test for Welded Joints (B. Kuhn, C. Ullrich, H. Tschaffon, T. Beck, and L. Singheiser), March, 207
Rate- and Temperature-Dependent Fracture Characteristics of Asphaltic Paving Mixtures (Soohyok Im, Yong-Rak Kim, and Hoki Ban), March, 257
Development of a Composite Specimen Interface Cracking (CSIC) Test for Top-Down Cracking (Yu Chen, Gabriele Tebaldi, Reynaldo Roque, and George Lopp), Jul., 625

Fracture energy
Fatigue Analysis of Asphalt Concrete under Indirect Tensile Mode of Loading Using Crack Images (Manh Tuan Nguyen, Hyun Jong Lee, and Jongeun Baek), Jan., 148
Toward Development of a New Thermal Cracking Test Using the Dynamic Shear Rheometer (Haifang Wen and Sushanta Bhusal), May, 425
Effect of Steel Fibers and Thermal Cycles on Fracture Properties of Ultra-High-Performance Concrete (Ibrahim Hakeem, Abul K. Azad, and Shamsad Ahmad), May, 458

Fracture toughness
Effect of Steel Fibers and Thermal Cycles on Fracture Properties of Ultra-High-Performance Concrete (Ibrahim Hakeem, Abul K. Azad, and Shamsad Ahmad), May, 458

Friction resistance
Evaluating Frictional Characteristics of Typical Wearing Course Mixtures in Louisiana (Zhong Wu, Xiaoming Yang, Vivek Lal Das, and Louay N. Mohammad), Jul., 579

Fruit quality
Impact of Leaf/Bunch Ratio and Time of Application on Yield and Fruit Quality of Barhi Date Palm Trees (*Phoenix dactylifera* L.) Under Saudi Arabian Conditions (Alaa El-Din K. Omar, S. S. Soliman, and M. A. Ahmed), Sep., 813

Functionally graded composite
Functionally Graded Bronze/Tungsten-Carbide Castings: A Characterization and Property Study (Lloyd Brown and Peter Joyce), Jan., 22

Fuzzy analytical hierarchy process (FAHP)
An Evaluation Model Using Fuzzy TOPSIS and Goal Programming for TQM Consultant Selection (Chin-Nung Liao), Jan., 122

Fuzzy data
Fuzzy Testing for Regression Coefficient of Fuzzy Numbers (Cheng-Che Chen, Chun-Mei Lai, and Wen-Chi Sun), Jan., 116

Fuzzy GIS
Fuzzy-GIS Approach for Applying the AHP Multi-Criteria Decision-Making Model to Evaluate Real Estate Purchases (Chin-Tsai Lin and Jun-Kun Lin), Nov., 978

Fuzzy number
Fuzzy Testing for Regression Coefficient of Fuzzy Numbers (Cheng-Che Chen, Chun-Mei Lai, and Wen-Chi Sun), Jan., 116

Fuzzy testing
Fuzzy Testing for Regression Coefficient of Fuzzy Numbers (Cheng-Che Chen, Chun-Mei Lai, and Wen-Chi Sun), Jan., 116

G

Gamma distribution
Decision Procedure for the Weibull Distribution Based on Run Lengths of Conforming Items (Muhammad Aslam, Mohammad Saber Fallah Nezhad, and Muhammad Azam), Sep., 826

GaN
Stress State of GaN Epilayer Grown on Sapphire and 6H-SiC Substrates (Kexiong Zhang, Hongwei Liang, Shiwei Song, Dechao Yang, Rensheng Shen, Yang Liu, Xiaochuan Xia, Yingmin Luo, and Guotong Du), Sep., 798

Gauge repeatability and reproducibility
An Assessment of Gauge Repeatability and Reproducibility with Multiple Characteristics (Fu-Kwun Wang), Jul., 651

Gelation
Advances in the Understanding of Gelation in the Framework of the Test ASTM D5133 (J. A. Maroto-Centeno, T. Pérez-Gutiérrez, and M. Quesada-Pérez), March, 305

Generalization C_{pk}^{T} index
Supplier Selection for Processes with Multiple Characteristics Based on Testing Capability Index C_{pk} (W. L. Pearn and C. H. Wu), Jul., 534

Genetic optimization
Method for Dynamic Material Property Characterization of Soft-Tissue-Mimicking Isotropic Viscoelastic Materials Using Fractional Damping Models (Bryn A. Martin, Umit Kutluay, and Yigit Yazicioglu), Sep., 804

Geographic information systems (GIS)
Fuzzy-GIS Approach for Applying the AHP Multi-Criteria Decision-Making Model to Evaluate Real Estate Purchases (Chin-Tsai Lin and Jun-Kun Lin), Nov., 978

Geometric leveling
Comparator With Optical Encoder System for the Calibration of Leveling Staffs (Aleš Marjetič and Dušan Kogoj), Sep., 818

Geometric validation
Validating Computational Models from Laser Scanning Data for Historic Facades (Linh Truong-Hong and Debra F. Laefer), May, 481

Geosynthetics
Apparatus for Geosynthetic Interface Testing and Evaluation Under Elevated Temperature Conditions (Tanay Karademir and J. David Frost), March, 313

Glass defect
Study on Glass Defect Inspection Based on Projecting Grating Method (Yong Jin, Zhaoba Wang, Linquan Zhu, Jiliang Yang, and Bo Wei), March, 332

Goal programming (GP)
An Evaluation Model Using Fuzzy TOPSIS and Goal Programming for TQM Consultant Selection (Chin-Nung Liao), Jan., 122

Grade 91
Optimization of Vickers Hardness Parameters for Micro- And Macro-Indentation of Grade 91 Steel (J. A. Siefert, J. P. Shingledecker, and J. D. Parker), Sep., 778

Granular activated carbon
Treatment of Landfill Leachate by Microwave-Fenton Oxidation Process Catalyzed by Fe^{2+} Loaded on GAC (Zhan Ding and Weisheng Guan), Sep., 693

Granular materials
Apparatus for Geosynthetic Interface Testing and Evaluation Under Elevated Temperature Conditions (Tanay Karademir and J. David Frost), March, 313

Grey prediction
Applying Hybrid Grey Models in Analyzing Tonnage Growth Trends in Bulk Shipping Among China, Hong Kong, and Taiwan (Cheng-Chi Chung), May, 374

Ground reaction forces
A New Device for Simulating Athlete-to-Surface Interactions on Natural and Synthetic Turf (Adam W. Thoms, James T. Brosnan, Max R. Paquette, Songning Zhang, and John C. Sorochan), May, 497

Group acceptance sampling
Two-Stage Group Acceptance Sampling Plan for Burr Type X Percentiles (Muhammad Aslam, Muhammad Azam, Y. L. Lio, and Chi-Hyuck Jun), Jul., 525

GSDM
Evaluating Convention Destination Images in Australia and Asia (Chin-Tsai Lin and Chiu-Wen Lin), Sep., 851

Guy anchor
Evaluation of Guy Anchorage Strength in Clay for Transmission Tower (Warat Kongkitkul, Sorawut Srisakorn, Thitapan Chantachot, Sompote Youwai, Pornkasem Jongpradist, and Chaloempon Bunjongruksa), Jul., 564

H

Hardening
Effect of Electrical Discharge Machining (EDM) on Charpy Test Results from Miniaturized Steel Specimens (Enrico Lucon), Jan., 1

Hardness
Optimization of Vickers Hardness Parameters for Micro- And Macro-Indentation of Grade 91 Steel (J. A. Siefert, J. P. Shingledecker, and J. D. Parker), Sep., 778

Hardness mapping
Optimization of Vickers Hardness Parameters for Micro- And Macro-Indentation of Grade 91 Steel (J. A. Siefert, J. P. Shingledecker, and J. D. Parker), Sep., 778

Hemicelluloses
Carboxyl Modification of Sugarcane Bagasse Hemicelluloses With Succinic Anhydride in Aqueous Solution (Lijun Wang, Xinliang Liu, Mengling Weng, Fusheng Wu, Zhoujun Li, and Shuangfei Wang), May, 517

High-cycle fatigue
Assessment of the Mean-Stress Sensitivity Factor Method in Stress-Life Fatigue Predictions (Robert Burger and Yung-Li Lee), March, 200

Hilbert-Huang transform
A Hybrid Model by Empirical Mode Decomposition and Support Vector Regression for Tourist Arrivals Forecasting (Ming-Cheng Lai, Ching-Chiang Yeh, and Lon-Fon Shieh), May, 351

Homogeneous Nucleation Theory
Advances in the Understanding of Gelation in the Framework of the Test ASTM D5133 (J. A. Maroto-Centeno, T. Pérez-Gutiérrez, and M. Quesada-Pérez), March, 305

Honeycomb
Compressive Behavior of Square-Cell Titanium Honeycomb (Ryan Parsons, Elizabeth Frink, Kevin Lease, and Suzanne Dubnicka), March, 179

Hot asphalt
Use of Sweep Test for Emulsion and Hot Asphalt Chip Seals: Laboratory and Field Evaluation (Nazimuddin M. Wasiuddin, Amanda Marshall, Nibert E. Saltibus, Aziz Saber, Christopher Abadie, and Louay N. Mohammad), March, 289

Housing purchases
Fuzzy-GIS Approach for Applying the AHP Multi-Criteria Decision-Making Model to Evaluate Real Estate Purchases (Chin-Tsai Lin and Jun-Kun Lin), Nov., 978

Humidity
Experimental Testing and Evaluation of Parameters on the Extraction of Water from Air Using Thermoelectric Coolers (F. L. Tan and S. C. Fok), Jan., 96

Hydrogen embrittlement
An Investigation of Hydrogen Environment Effect on the Strain Aging of Low-Carbon Steel through Vickers Hardness Test (Dongsun Lee, Aki-nori Yamamoto, Yasuji Oda, and Hiroshi Noguchi), Jan., 69

I

Immersion ultrasonic stress measurement
Comparison between Contact and Immersion Method in Ultrasonic Stress Measurement of Welded Stainless Steel Plates

(Yashar Javadi, Mehdi Ahmadi Najafabadi, and Mehdi Akhlaghi), Sep., 788

Impedance spectroscopy
Impedance Spectroscopy Characterization of a Piezoresistive Structural Polymer Composite Bulk Sensor (C. Vipulanandan and P. Prashanth), Nov., 898

Indentation size effect
Optimization of Vickers Hardness Parameters for Micro- And Macro-Indentation of Grade 91 Steel (J. A. Siefert, J. P. Shingledecker, and J. D. Parker), Sep., 778

Indirect tensile
Fatigue Analysis of Asphalt Concrete under Indirect Tensile Mode of Loading Using Crack Images (Manh Tuan Nguyen, Hyun Jong Lee, and Jongeun Baek), Jan., 148

Indirect tensile test (fatigue and rutting)
A Laboratory Study to Predict the Rutting and Fatigue Behavior of Asphalt Concrete Using the Indirect Tensile Test (Haifang Wen and Sushanta Bhusal), March, 299

Influence depth
Effectiveness of Asphalt Rejuvenator (Jusang Lee, Shuo Li, Yongjoo Kim, and Jaejun Lee), May, 433

Information and communication technologies
Evaluating Smart Living Technology Strategies Using the Analytic Network Process (Lon-Fon Shieh, Ching-Chiang Yeh, and Ming-Cheng Lai), Nov., 1011

Inhomogeneity
Inhomogeneous Micro-Structure Influence on Macro-Crack of Sandstone (Yunliang Tan, Yanchun Yin, and Dongmei Huang), Nov., 1024

Injury
A New Device for Simulating Athlete-to-Surface Interactions on Natural and Synthetic Turf (Adam W. Thoms, James T. Brosnan, Max R. Paquette, Songning Zhang, and John C. Sorochan), May, 497

Instability
Loading Rate Concerns in ASTM C1609 (N. Banthia and S. T. Islam), Nov., 1032

Interface
Development of a Composite Specimen Interface Cracking (CSIC) Test for Top-Down Cracking (Yu Chen, Gabriele Tebaldi, Reynaldo Roque, and George Lopp), Jul., 625

Interface debonding
Investigation of Delamination on I-65 in Indiana (Jusang Lee, Hyungjun Ahn, Ayesha Shah, and Kurt Sommer), Sep., 745

Interface strength
Apparatus for Geosynthetic Interface Testing and Evaluation Under Elevated Temperature Conditions (Tanay Karademir and J. David Frost), March, 313

Interfacial zone
Nano-Mechanical Characterization of Mastic, Aggregate, and Interfacial Zone in Asphalt Composites (S. Khorasani, E. Masad, E. Kassem, and R. K. Abu Al-Rub), Nov., 924

Internal and external mixing
Measurement and Prediction of Heat of Hydration of Portland Cement Using Isothermal Conduction Calorimetry (Ahmadreza Sedaghat, A. Zayed, and Paul Sandberg), Nov., 943

Inverse scattering
Time Domain Microwave Imaging of a Buried Homogeneous Dielectric Cylinder in a Slab Medium by Asynchronous Particle Swarm Optimization (Chien-Ching Chiu, Chung-Hsin Huang, Ching-Lieh Li, and Lung-Fai Tuen), May, 417

Iosipescu shear test
Measuring Mechanical Properties of the 3D Carbon/Carbon Composite Using Automated Grid Method (Xiaofeng Li, Zhongwei Zhang, Lijun Qin, Xiaoguang Yang, Zhihai Feng, Yang Wang, Hong Miao, Linghui He, and Xinglong Gong), Jan., 81

Iron (I)
In Situ Observation and Model Test on Zonal Disintegration in Deep Tunnels (Xu-Guang Chen, Qiang-Yong Zhang, Yuan Wang, Shu-Cai Li, and Han-Peng Wang), Nov., 990

ISO 12004-2
Detailed Investigation of Forming Limit Determination Standards for Aluminum Alloys (Murat Dilmec, H. Selcuk Halkaci, Fahrettin Ozturk, and Mevlut Turkoz), Jan., 10

Isothermal conduction calorimetry
Measurement and Prediction of Heat of Hydration of Portland Cement Using Isothermal Conduction Calorimetry (Ahmadreza Sedaghat, A. Zayed, and Paul Sandberg), Nov., 943

J

***J*-integral**
A Numerical Study on Effective Modulus of Elasticity in Crack Length Evaluation for Single-Edge Bending Specimens (Enyang Wang, Wenxing Zhou, and Guowu Shen), Sep., 770

K

Kinetics model
Treatment of Landfill Leachate by Microwave-Fenton Oxidation Process Catalyzed by Fe^{2+} Loaded on GAC (Zhan Ding and Weisheng Guan), Sep., 693

KLST specimen
Effect of Electrical Discharge Machining (EDM) on Charpy Test Results from Miniaturized Steel Specimens (Enrico Lucon), Jan., 1

Kunzelstab penetration test
Evaluation of Guy Anchorage Strength in Clay for Transmission Tower (Warat Kongkitkul, Sorawut Srisakorn, Thitapan Chantachot, Sompote Youwai, Pornkasem Jongpradist, and Chaloempon Bunjongruksa), Jul., 564

L

Landfill leachate treatment
Treatment of Landfill Leachate by Microwave-Fenton Oxidation Process Catalyzed by Fe^{2+} Loaded on GAC (Zhan Ding and Weisheng Guan), Sep., 693

Large deflection apparatus
Analysis of Support Apparatus for Flexural Load-Deflection Testing: Minimizing Bias Caused by Arching Forces (Ronald F. Zollo), Jan., 63

Least-squares method
Improved Digital Image Correlation Method for Eliminating Pixel Shape-Induced Errors in Shear-Strain Calculations (Bei Peng, Chengcheng Huang, Wu Zhou, Huijun Yu, and Zhi Zeng), March, 231

Leveling staff
Comparator With Optical Encoder System for the Calibration of Leveling Staffs (Aleš Marjetič and Dušan Kogoj), Sep., 818

Life prediction
White OLED Weibull Life Prediction Using Maximum Likelihood Estimation (Jian-ping Zhang, Jiong-lei Wu, Yu Liu, Helen Wu, Aixi Zhou, and Wen-li Wu), Jan., 76

Life test
Two-Stage Group Acceptance Sampling Plan for Burr Type X Percentiles (Muhammad Aslam, Muhammad Azam, Y. L. Lio, and Chi-Hyuck Jun), Jul., 525

Lifetime prediction
Lifetime Prediction of White OLED Based on MLE Under Lognormal Distribution (Jian-Ping Zhang, Dong-Liang Li, Wen-Li Wu, Helen Wu, and Wen-Qing Zhu), May, 398

Limiting quality level
Selection of Modified Lot Sensitive Sampling Inspection Plans for Isolated Lots With Small Acceptance Numbers (R. Vijayaraghavan, A. Loganathan, and D. Rajalakshmi), Sep., 845

Load
Centrifuge Model Test Study of Static and Cyclic Behavior of a Pile Foundation for an Offshore Wind Generator (Ga Zhang, Bing Rong, and Ping Fu), Sep., 701

Loading rate
Loading Rate Concerns in ASTM C1609 (N. Banthia and S. T. Islam), Nov., 1032

Locker
Implementation and Use of Feasibility Assessment of Biometric Locker System for Swimmers (Yun-Long Lay, Hui-Jen Yang, Chern-Sheng Lin, and Chung-Ho Tsai), Nov., 883

Lognormal distribution
Lifetime Prediction of White OLED Based on MLE Under Lognormal Distribution (Jian-Ping Zhang, Dong-Liang Li, Wen-Li Wu, Helen Wu, and Wen-Qing Zhu), May, 398

Lot sensitive plan
Selection of Modified Lot Sensitive Sampling Inspection Plans for Isolated Lots With Small Acceptance Numbers (R. Vijayaraghavan, A. Loganathan, and D. Rajalakshmi), Sep., 845

Low strength concrete
Modal Identification of Different RC Frames Using Experimental Measurements (Mehmet Emin Arslan and Ahmet Durmuş), Nov., 970

Low temperature
Effect of Binder Type, Mastic, and Aggregate Type on the Low-Temperature Characteristics of Modified Hot Mix Asphalt (Walaa S. Mogawer, Alexander J. Austerman, and Sang-Soo Kim), Nov., 914

M

Machine repair model
Analysis of the Machine Repair Models With Multi-Threshold Synchronous Vacations (Chia-Huang Wu, Jau-Chuan Ke, and Gautam Choudhury), May, 366

Machining
Effect of Working Parameters on Excavation Rate and Specific Energy on Surface Treatment With Pure Water Jet (Yilmaz Ozcelik, Raimondo Ciccu, and Augusto Bortolussi), Jan., 104

Macrocrack
Inhomogeneous Micro-Structure Influence on Macro-Crack of Sandstone (Yunliang Tan, Yanchun Yin, and Dongmei Huang), Nov., 1024

Macro-texture
Evaluating Frictional Characteristics of Typical Wearing Course Mixtures in Louisiana (Zhong Wu, Xiaoming Yang, Vivek Lal Das, and Louay N. Mohammad), Jul., 579

Maltene rejuvenator
Effectiveness of Asphalt Rejuvenator (Jusang Lee, Shuo Li, Yongjoo Kim, and Jaejun Lee), May, 433

Markov model
Decision Procedure for the Weibull Distribution Based on Run Lengths of Conforming Items (Muhammad Aslam, Mohammad Saber Fallah Nezhad, and Muhammad Azam), Sep., 826

Master curve
Effect of Temperature and Frequency on Visco-Elastic Dynamic Response of Asphalt Mixture (Peilong Li, Zhan Ding, and Zhengqi Zhang), Jul., 571
A Re-Look at the Asphalt Mixture Performance Test Protocols and Computational Algorithms (Neethu Roy, A. Veeraragavan, P. K. Jain, and J. Murali Krishnan), Sep., 729

Material characterization
An Experimental Device for Material Characterization of Powder Materials (Per Lindskog, Daniel C. Andersson, and Per-Lennart Larsson), May, 504
Method for Dynamic Material Property Characterization of Soft-Tissue-Mimicking Isotropic Viscoelastic Materials Using Fractional Damping Models (Bryn A. Martin, Umit Kutluay, and Yigit Yazicioglu), Sep., 804

Material properties
Functionally Graded Bronze/Tungsten-Carbide Castings: A Characterization and Property Study (Lloyd Brown and Peter Joyce), Jan., 22

Mean stress
Assessment of the Mean-Stress Sensitivity Factor Method in Stress-Life Fatigue Predictions (Robert Burger and Yung-Li Lee), March, 200

Mean-stress correction model
Assessment of the Mean-Stress Sensitivity Factor Method in Stress-Life Fatigue Predictions (Robert Burger and Yung-Li Lee), March, 200

Mean-stress sensitivity factor
Assessment of the Mean-Stress Sensitivity Factor Method in Stress-Life Fatigue Predictions (Robert Burger and Yung-Li Lee), March, 200

Mechanical properties
Functionally Graded Bronze/Tungsten-Carbide Castings: A Characterization and Property Study (Lloyd Brown and Peter Joyce), Jan., 22
Measuring Mechanical Properties of the 3D Carbon/Carbon Composite Using Automated Grid Method (Xiaofeng Li, Zhongwei Zhang, Lijun Qin, Xiaoguang Yang, Zhihai Feng, Yang Wang, Hong Miao, Linghui He, and Xinglong Gong), Jan., 81

Meeting planner
Evaluating Convention Destination Images in Australia and Asia (Chin-Tsai Lin and Chiu-Wen Lin), Sep., 851

Melt flow index
Understanding Melt Index and ASTM D1238 (A. M. Mertz, A. W. Mix, H. M. Baek, and A. J. Giacomin), Jan., 50

Melt flow rate
Understanding Melt Index and ASTM D1238 (A. M. Mertz, A. W. Mix, H. M. Baek, and A. J. Giacomin), Jan., 50

Melt index
Understanding Melt Index and ASTM D1238 (A. M. Mertz, A. W. Mix, H. M. Baek, and A. J. Giacomin), Jan., 50

MEPDG
Behavior of Selected Warm Mix Asphalt Additive Modified Binders and Prediction of Dynamic Modulus of the Mixes (Zahid Hossain and Musharraf Zaman), Jan., 159

Metal fatigue
Method for Assessing Applicability of an Artificial Flaw as a Small Initial Crack for Fatigue Limit Evaluation and Its Application to a Drill Hole and an FIB Processed Sharp Notch in Annealed 0.45% Carbon Steel (Junji Sakamoto, Yoshimasa Takahashi, Yuuta Aono, and Hiroshi Noguchi), March, 194

Metal matrix composite
Functionally Graded Bronze/Tungsten-Carbide Castings: A Characterization and Property Study (Lloyd Brown and Peter Joyce), Jan., 22
A Solution for Estimating the Tensile Yield Strength From Small Specimens (Jonathan Mak, Tao Wei, Richard Wuhrer, Wing Yeung, Greg Heness, and Zhang Di), Jul., 647

Metalorganic chemical vapor deposition
Stress State of GaN Epilayer Grown on Sapphire and 6H-SiC Substrates (Kexiong Zhang, Hongwei Liang, Shiwei Song, Dechao Yang, Rensheng Shen, Yang Liu, Xiaochuan Xia, Yingmin Luo, and Guotong Du), Sep., 798

Microcracks
Effect of Electrical Discharge Machining (EDM) on Charpy Test Results from Miniaturized Steel Specimens (Enrico Lucon), Jan., 1

Microstructure
Inhomogeneous Micro-Structure Influence on Macro-Crack of Sandstone (Yunliang Tan, Yanchun Yin, and Dongmei Huang), Nov., 1024

Micro-texture
Evaluating Frictional Characteristics of Typical Wearing Course Mixtures in Louisiana (Zhong Wu, Xiaoming Yang, Vivek Lal Das, and Louay N. Mohammad), Jul., 579

Microwave
Treatment of Landfill Leachate by Microwave-Fenton Oxidation Process Catalyzed by Fe^{2+} Loaded on GAC (Zhan Ding and Weisheng Guan), Sep., 693

Milling
Effect of Electrical Discharge Machining (EDM) on Charpy Test Results from

Miniaturized Steel Specimens (Enrico Lucon), Jan., 1

Mineral oils
Preliminary Evaluation of the Ergonomic Properties of Gloves for Protection Against Mineral Oils Based on Manual Dexterity Tests (Sylwia Krzemińska and Emilia Irzmańska), Nov., 875

Miniaturized Charpy test
Effect of Electrical Discharge Machining (EDM) on Charpy Test Results from Miniaturized Steel Specimens (Enrico Lucon), Jan., 1

Minimum distance classification
Determination of Dry Rubber Content in Natural Rubber Latex Based on Wavelet-Domain Fluorescence Image (Lin Zhang, Zhimin Zhao, Yuyu Ji, and Lei Ji), Jul., 667

Mixture of distributions
Evaluation of Single Sampling Plans by Attributes Using Mixture of Two Distributions (A. Loganathan, P. Muthu Krishnan, R. Vijayaraghavan, and M. Saral), Jul., 675

MLE
White OLED Weibull Life Prediction Using Maximum Likelihood Estimation (Jian-ping Zhang, Jiong-lei Wu, Yu Liu, Helen Wu, Aixi Zhou, and Wen-li Wu), Jan., 76
Lifetime Prediction of White OLED Based on MLE Under Lognormal Distribution (Jian-Ping Zhang, Dong-Liang Li, Wen-Li Wu, Helen Wu, and Wen-Qing Zhu), May, 398

Model steel bridge
Variability of Modal Parameter Estimations Using Two Different Output-Only System Identification Methods (Ozgur Ozcelik and Mohammad Salavati), Nov., 1001

Modified asphalt (MA)
Evaluation of Asphalt Blended With Low Percentage of Carbon Micro-Fiber and Nanoclay (Hui Yao, Zhanping You, Liang Li, Shu Wei Goh, Julian Mills-Beale, Xianming Shi, and David Wingard), March, 278

Modified asphalt
Effect of Binder Type, Mastic, and Aggregate Type on the Low-Temperature Characteristics of Modified Hot Mix Asphalt (Walaa S. Mogawer, Alexander J. Austerman, and Sang-Soo Kim), Nov., 914

Moisture content
Monitoring of Vertical Movement in a Four-Story Wood-Frame Building in Coastal British Columbia (Jieying Wang, Chun Ni, and Gamal Mustapha), Jul., 611

Moisture susceptibility
Mechanistic Evaluation of the Effect of WMA Additives on Wettability and Moisture Susceptibility Properties of Asphalt Mixes (Rouzbeh Ghabchi, Dharamveer Singh, Musharraf Zaman, and Qingyan Tian), Nov., 933

Mortar content
Acid Treatment Technique for Determining the Mortar Content of Recycled Concrete Aggregates (A. Akbarnezhad, K. C. G. Ong, M. H. Zhang, and C. T. Tam), May, 441

Multiple characteristics
Aircraft Turbine Engine Manufacturing with Multiple Specifications (S. J. Lin, D. L. Yang, F. T. Cheng, and M. F. Wu), Jan., 32
Supplier Selection for Processes with Multiple Characteristics Based on Testing Capability Index C_{pk} (W. L. Pearn and C. H. Wu), Jul., 534

Multivariate analysis of variance
An Assessment of Gauge Repeatability and Reproducibility with Multiple Characteristics (Fu-Kwun Wang), Jul., 651

***M*-value**
Exploration of a Performance Test for Emulsion Treated Asphalt Surfaces (Andrew Braham, Isaac L. Howard, and Jason Barham), March, 269

N

Nanocrystal
Concentration Effect on Photoluminescence Tests of the CdSe Colloid Nanocrystal System (Zhonghai Lin, Zhilin Zhu, Minqiang Wang, Guangfen Wei, Huiqiu Du, Pinjian Wang, Yanwu Liu, and Zhi Yang), Nov., 890

Nanoindentation
Nano-Mechanical Characterization of Mastic, Aggregate, and Interfacial Zone in Asphalt Composites (S. Khorasani, E. Masad, E. Kassem, and R. K. Abu Al-Rub), Nov., 924

Nanomaterial
Evaluation of Asphalt Blended With Low Percentage of Carbon Micro-Fiber and Nanoclay (Hui Yao, Zhanping You, Liang Li, Shu Wei Goh, Julian Mills-Beale, Xianming Shi, and David Wingard), March, 278

Nano-properties
Nano-Mechanical Characterization of Mastic, Aggregate, and Interfacial Zone in Asphalt Composites (S. Khorasani, E. Masad, E. Kassem, and R. K. Abu Al-Rub), Nov., 924

Natural rubber latex
Determination of Dry Rubber Content in Natural Rubber Latex Based on Wavelet-Domain Fluorescence Image (Lin Zhang, Zhimin Zhao, Yuyu Ji, and Lei Ji), Jul., 667

NDT
A Study of Total Focusing Method for Ultrasonic Nondestructive Testing (Po-Yen Tseng, Young-Fo Chang, Chao-Ming Lin, Wei-Jen Nien, Chih-Hsiung Chang, and Chih-Chung Huang), Jul., 557

Neural network
Corporate Performance Forecasting Using Hybrid Rough Set Theory, Neural Networks, and DEA (Chiun-Sin Lin, Tzu-Yu Lin, and Sheng-Hsiung Chiu), May, 359

Nickel alloys
Stress-Relaxation Cracking Test for Welded Joints (B. Kuhn, C. Ullrich, H. Tschaffon, T. Beck, and L. Singheiser), March, 207

Non-contact
A New Device for Simulating Athlete-to-Surface Interactions on Natural and Synthetic Turf (Adam W. Thoms, James T. Brosnan, Max R. Paquette, Songning Zhang, and John C. Sorochan), May, 497

Non-contact measurement method
Measuring Mechanical Properties of the 3D Carbon/Carbon Composite Using Automated Grid Method (Xiaofeng Li, Zhongwei Zhang, Lijun Qin, Xiaoguang Yang, Zhihai Feng, Yang Wang, Hong Miao, Linghui He, and Xinglong Gong), Jan., 81

Non-propagating crack
Method for Assessing Applicability of an Artificial Flaw as a Small Initial Crack for Fatigue Limit Evaluation and Its Application to a Drill Hole and an FIB Processed Sharp Notch in Annealed 0.45% Carbon Steel (Junji Sakamoto, Yoshimasa Takahashi, Yuuta Aono, and Hiroshi Noguchi), March, 194

Normal distribution
Multiple Dependent State Sampling Plan Based on Process Capability Index (Muhammad Aslam, Muhammad Azam, and Chi-Hyuck Jun), March, 340

Normal strength concrete
Modal Identification of Different RC Frames Using Experimental Measurements (Mehmet Emin Arslan and Ahmet Durmuş), Nov., 970

Numerical simulation
A Non-Destructive Evaluation Strategy for Thick Coating Evaluation on Hemispherical Steel Shells of Different Sizes with a Wide-Range ECT Sensor (Dongli Zhang, Zhaoba Wang, Zhenmao Chen, and Yong Li), Jul., 551
Measurement and Evaluation of the Thermal Expansion Coefficient of Rock-Filled Concrete (Jin-Ting Wang, Shuo Wang, and Feng Jin), Nov., 951

O

Operating characteristic curve
Selection of Modified Lot Sensitive Sampling Inspection Plans for Isolated Lots With Small Acceptance Numbers (R.

Vijayaraghavan, A. Loganathan, and D. Rajalakshmi), Sep., 845

Operating characteristic function
Evaluation of Single Sampling Plans by Attributes Using Mixture of Two Distributions (A. Loganathan, P. Muthu Krishnan, R. Vijayaraghavan, and M. Saral), Jul., 675

Operational modal analysis
Modal Identification of Different RC Frames Using Experimental Measurements (Mehmet Emin Arslan and Ahmet Durmuş), Nov., 970

Opportunities
An Application of AHP and Sensitivity Analysis for Measuring the Best Strategy of Reverse Logistics: A Case Study of Photovoltaic Industry Chain (Chun-Yueh Lin and Yih-Chearng Shiue), May, 386

Optical characteristics
Concentration Effect on Photoluminescence Tests of the CdSe Colloid Nanocrystal System (Zhonghai Lin, Zhilin Zhu, Minqiang Wang, Guangfen Wei, Huiqiu Du, Pinjian Wang, Yanwu Liu, and Zhi Yang), Nov., 890

Optical encoder system
Comparator With Optical Encoder System for the Calibration of Leveling Staffs (Aleš Marjetič and Dušan Kogoj), Sep., 818

Optimum dosage
Evaluation of Effect of Superplasticizer on Performance of Self-Compacting Concrete (Shamsad Ahmad), Sep., 754

Output-only system identification
Variability of Modal Parameter Estimations Using Two Different Output-Only System Identification Methods (Ozgur Ozcelik and Mohammad Salavati), Nov., 1001

P

Packaging dynamics
Statistical Analysis of the Stress-Energy Methodology Applied to Cushion Curve Determination (Kendalyn Paulin, Gregory Batt, and Matthew Daum), May, 409

Particle breakage
Particle Breakage of Cement Ellipsoid Aggregate—Part II: Investigation of Particle Crushing (Bing-yin Zhang, Yu-xin Jie, and De-zhi Kong), Sep., 761

Particle crushing
Particle Breakage of Cement Ellipsoid Aggregate—Part II: Investigation of Particle Crushing (Bing-yin Zhang, Yu-xin Jie, and De-zhi Kong), Sep., 761

Pavement
Engineering Properties of Prime Coats Applied to a Granular Base (Gouri Mohan, Yetkin Yildirim, Kenneth H. Stokoe, II, and Mustafa B. Erten), Sep., 713

Pavement performance
Rate- and Temperature-Dependent Fracture Characteristics of Asphaltic Paving Mixtures (Soohyok Im, Yong-Rak Kim, and Hoki Ban), March, 257

Performance
Effect of Working Parameters on Excavation Rate and Specific Energy on Surface Treatment With Pure Water Jet (Yilmaz Ozcelik, Raimondo Ciccu, and Augusto Bortolussi), Jan., 104
Performance Evaluation of Asphalt-Rubber Stone Matrix Asphalt Mixtures with Warm Mix Asphalt Additives (Weidong Cao and Shutang Liu), Jan., 141

Performance evaluation
Design and Evaluation of Low-Latency and Shortest-Path Routing Algorithm for Triplet-Based Hierarchical Interconnection Network (Yang Zhang and Feng Shi), Jul., 541

Performance-based design
Calibration of Seal Coat Application Rate Design (Jusang Lee, Hyung Jun Ahn, Todd Shields, Dwayne Harris, and Shuo Li), March, 247

Permeability
Effectiveness of Asphalt Rejuvenator (Jusang Lee, Shuo Li, Yongjoo Kim, and Jaejun Lee), May, 433

Phantom material
Method for Dynamic Material Property Characterization of Soft-Tissue-Mimicking Isotropic Viscoelastic Materials Using Fractional Damping Models (Bryn A. Martin, Umit Kutluay, and Yigit Yazicioglu), Sep., 804

Phase angle
Effect of Temperature and Frequency on Visco-Elastic Dynamic Response of Asphalt Mixture (Peilong Li, Zhan Ding, and Zhengqi Zhang), Jul., 571

Phased array
A Study of Total Focusing Method for Ultrasonic Nondestructive Testing (Po-Yen Tseng, Young-Fo Chang, Chao-Ming Lin, Wei-Jen Nien, Chih-Hsiung Chang, and Chih-Chung Huang), Jul., 557

Piezoresistivity
Impedance Spectroscopy Characterization of a Piezoresistive Structural Polymer Composite Bulk Sensor (C. Vipulanandan and P. Prashanth), Nov., 898

Pile
Centrifuge Model Test Study of Static and Cyclic Behavior of a Pile Foundation for an Offshore Wind Generator (Ga Zhang, Bing Rong, and Ping Fu), Sep., 701

Platform wood frame construction
Monitoring of Vertical Movement in a Four-Story Wood-Frame Building in Coastal British Columbia (Jieying Wang, Chun Ni, and Gamal Mustapha), Jul., 611

Poisson distribution
Evaluation of Single Sampling Plans by Attributes Using Mixture of Two Distributions (A. Loganathan, P. Muthu Krishnan, R. Vijayaraghavan, and M. Saral), Jul., 675

Polyester polymer composite
Impedance Spectroscopy Characterization of a Piezoresistive Structural Polymer Composite Bulk Sensor (C. Vipulanandan and P. Prashanth), Nov., 898

Polyether sulfone
An Evaluation of the Non-Isothermal and Isothermal Pyrolysis of Polyether Sulfone in Thermogravimetric Analysis (Mu-Hoe Yang and Yeuh-Hui Lin), Jul., 619

Polyphosphoric acid
Rheological Behavior of Asphalt–Rubber Binders Modified With Shale-Oil Residue and Polyphosphoric Acid (Adalberto Leandro Faxina, Ana Paula Furlan, and Glauco Tulio Pessa Fabbri), Sep., 719

Portland cement hydration
Portland Cement Hydration by Electrical Resistivity Method and Computer Simulation (Yibing Zuo and Xiaosheng Wei), May, 451

Potential movement
Expansive Clay Suction Measurements Using Filter Paper and Polymer-Capacitance Sensor Methods (Landris T. Lee, Jr.), Nov., 905

Powder materials
An Experimental Device for Material Characterization of Powder Materials (Per Lindskog, Daniel C. Andersson, and Per-Lennart Larsson), May, 504

Predictive accuracy
A Numerical Study on Effective Modulus of Elasticity in Crack Length Evaluation for Single-Edge Bending Specimens (Enyang Wang, Wenxing Zhou, and Guowu Shen), Sep., 770

Pre-fatigue
A Method to Obtain Straight Crack Fronts During Pre-Cracking of Compact Tension Specimens (Martin Öberg), Sep., 858

Prime coat
Engineering Properties of Prime Coats Applied to a Granular Base (Gouri Mohan, Yetkin Yildirim, Kenneth H. Stokoe, II, and Mustafa B. Erten), Sep., 713

Principal component analysis
An Assessment of Gauge Repeatability and Reproducibility with Multiple Characteristics (Fu-Kwun Wang), Jul., 651

Process capability index
Aircraft Turbine Engine Manufacturing with Multiple Specifications (S. J. Lin, D. L. Yang, F. T. Cheng, and M. F. Wu), Jan., 32
Multiple Dependent State Sampling Plan Based on Process Capability Index

(Muhammad Aslam, Muhammad Azam, and Chi-Hyuck Jun), March, 340

Producer and consumer risks
Two-Stage Group Acceptance Sampling Plan for Burr Type X Percentiles (Muhammad Aslam, Muhammad Azam, Y. L. Lio, and Chi-Hyuck Jun), Jul., 525

Producer's risk
Multiple Dependent State Sampling Plan Based on Process Capability Index (Muhammad Aslam, Muhammad Azam, and Chi-Hyuck Jun), March, 340

Product testing device
Failure Analysis of a Set of Flapper Valves Under ALT With Alternative Test Device (J. A. Martins, I. Ferreira, D. Leite, and E. C. Romão), March, 324

Proof stress
Computation and Uncertainty Evaluation of Offset Yield Strength (Ariel E. Matusevich, Julio C. Massa, and Reinaldo A. Mancini), March, 217

Protective gloves
Preliminary Evaluation of the Ergonomic Properties of Gloves for Protection Against Mineral Oils Based on Manual Dexterity Tests (Sylwia Krzemińska and Emilia Irzmańska), Nov., 875

Pull-off test
Investigation of Delamination on I-65 in Indiana (Jusang Lee, Hyungjun Ahn, Ayesha Shah, and Kurt Sommer), Sep., 745

Q

Quasi-Newton method
Analysis of the Machine Repair Models With Multi-Threshold Synchronous Vacations (Chia-Huang Wu, Jau-Chuan Ke, and Gautam Choudhury), May, 366

R

RC frames
Modal Identification of Different RC Frames Using Experimental Measurements (Mehmet Emin Arslan and Ahmet Durmuş), Nov., 970

Recast layer
Effect of Electrical Discharge Machining (EDM) on Charpy Test Results from Miniaturized Steel Specimens (Enrico Lucon), Jan., 1

Reclaimed asphalt pavement
Thermal Cracking Potential of High RAP-WMA Evaluated With Bending Beam Rheometer Mixture Beam Test (Jesse D. Doyle and Isaac L. Howard), March, 236

Recognition
Implementation and Use of Feasibility Assessment of Biometric Locker System for Swimmers (Yun-Long Lay, Hui-Jen Yang, Chern-Sheng Lin, and Chung-Ho Tsai), Nov., 883

Recycled concrete
A Study on the Residual Fatigue Strain and Damage of Steel Fiber Reinforced Recycled Concrete Under Constant Amplitude Flexural Fatigue Loading (Yang Runnian and Wei Demin), May, 465

Recycled concrete aggregate
A Laboratory Study to Predict the Rutting and Fatigue Behavior of Asphalt Concrete Using the Indirect Tensile Test (Haifang Wen and Sushanta Bhusal), March, 299

Recycling
Acid Treatment Technique for Determining the Mortar Content of Recycled Concrete Aggregates (A. Akbarnezhad, K. C. G. Ong, M. H. Zhang, and C. T. Tam), May, 441

Regression
Fuzzy Testing for Regression Coefficient of Fuzzy Numbers (Cheng-Che Chen, Chun-Mei Lai, and Wen-Chi Sun), Jan., 116

Relative humidity
Expansive Clay Suction Measurements Using Filter Paper and Polymer-Capacitance Sensor Methods (Landris T. Lee, Jr.), Nov., 905

Remote sensing
Validating Computational Models from Laser Scanning Data for Historic Facades (Linh Truong-Hong and Debra F. Laefer), May, 481

Removal ratio
Treatment of Landfill Leachate by Microwave-Fenton Oxidation Process Catalyzed by Fe^{2+} Loaded on GAC (Zhan Ding and Weisheng Guan), Sep., 693

Repetitive group sampling plan
Selection of Modified Lot Sensitive Sampling Inspection Plans for Isolated Lots With Small Acceptance Numbers (R. Vijayaraghavan, A. Loganathan, and D. Rajalakshmi), Sep., 845

Residual fatigue strain
A Study on the Residual Fatigue Strain and Damage of Steel Fiber Reinforced Recycled Concrete Under Constant Amplitude Flexural Fatigue Loading (Yang Runnian and Wei Demin), May, 465

Resistivity
Functionally Graded Bronze/Tungsten-Carbide Castings: A Characterization and Property Study (Lloyd Brown and Peter Joyce), Jan., 22

Reverse logistics
An Application of AHP and Sensitivity Analysis for Measuring the Best Strategy of Reverse Logistics: A Case Study of Photovoltaic Industry Chain (Chun-Yueh Lin and Yih-Chearng Shiue), May, 386

Rheological properties
Evaluation of Asphalt Blended With Low Percentage of Carbon Micro-Fiber and Nanoclay (Hui Yao, Zhanping You, Liang Li, Shu Wei Goh, Julian Mills-Beale, Xianming Shi, and David Wingard), March, 278

Rheology
Rheological Characterization of Asphalt Concrete Using a Shear Box (Safwat F. Said, Hassan Hakim, and Olle Eriksson), Jul., 602

Road
Application Research on Anti-Cracking Agent for Semi-Rigid Base (Hui Luo, Hong-Ping Zhu, Jian-Ming Zi, Ying Wang, and Yong-Fa Lu), Jan., 171

Rock-filled concrete
Measurement and Evaluation of the Thermal Expansion Coefficient of Rock-Filled Concrete (Jin-Ting Wang, Shuo Wang, and Feng Jin), Nov., 951

Rough set theory
Corporate Performance Forecasting Using Hybrid Rough Set Theory, Neural Networks, and DEA (Chiun-Sin Lin, Tzu-Yu Lin, and Sheng-Hsiung Chiu), May, 359

Routing algorithm
Design and Evaluation of Low-Latency and Shortest-Path Routing Algorithm for Triplet-Based Hierarchical Interconnection Network (Yang Zhang and Feng Shi), Jul., 541

Rutting
A Re-Look at the Asphalt Mixture Performance Test Protocols and Computational Algorithms (Neethu Roy, A. Veeraragavan, P. K. Jain, and J. Murali Krishnan), Sep., 729

S

Sand (S)
In Situ Observation and Model Test on Zonal Disintegration in Deep Tunnels (Xu-Guang Chen, Qiang-Yong Zhang, Yuan Wang, Shu-Cai Li, and Han-Peng Wang), Nov., 990

Scanning electron microscope
Evaluation of Asphalt Blended With Low Percentage of Carbon Micro-Fiber and Nanoclay (Hui Yao, Zhanping You, Liang Li, Shu Wei Goh, Julian Mills-Beale, Xianming Shi, and David Wingard), March, 278

SE(B)
A Study on the Fitting Accuracy of CMOD Compliance Equations (Enyang Wang, Wenxing Zhou, and Guowu Shen), March, 347
A Numerical Study on Effective Modulus of Elasticity in Crack Length Evaluation for Single-Edge Bending Specimens

(Enyang Wang, Wenxing Zhou, and Guowu Shen), Sep., 770

Seal coat
Calibration of Seal Coat Application Rate Design (Jusang Lee, Hyung Jun Ahn, Todd Shields, Dwayne Harris, and Shuo Li), March, 247

Self-compacting concrete (SCC)
Evaluation of Effect of Superplasticizer on Performance of Self-Compacting Concrete (Shamsad Ahmad), Sep., 754

SEM scanning
Inhomogeneous Micro-Structure Influence on Macro-Crack of Sandstone (Yunliang Tan, Yanchun Yin, and Dongmei Huang), Nov., 1024

Sensitivity analysis
An Application of AHP and Sensitivity Analysis for Measuring the Best Strategy of Reverse Logistics: A Case Study of Photovoltaic Industry Chain (Chun-Yueh Lin and Yih-Chearng Shiue), May, 386

Severe plastic deformation
Development of a New Testing Procedure for Performing Tensile Tests on Specimens with Sub-Millimetre Dimensions (Georg B. Rathmayr, Andrea Bachmaier, and Reinhard Pippan), Jul., 635

Shale-oil residue
Rheological Behavior of Asphalt–Rubber Binders Modified With Shale-Oil Residue and Polyphosphoric Acid (Adalberto Leandro Faxina, Ana Paula Furlan, and Glauco Tulio Pessa Fabbri), Sep., 719

Shallow crack
A Study on the Fitting Accuracy of CMOD Compliance Equations (Enyang Wang, Wenxing Zhou, and Guowu Shen), March, 347

Shear box
Rheological Characterization of Asphalt Concrete Using a Shear Box (Safwat F. Said, Hassan Hakim, and Olle Eriksson), Jul., 602

Shipping policy
Applying Hybrid Grey Models in Analyzing Tonnage Growth Trends in Bulk Shipping Among China, Hong Kong, and Taiwan (Cheng-Chi Chung), May, 374

Shrinkage
Expansive Clay Suction Measurements Using Filter Paper and Polymer-Capacitance Sensor Methods (Landris T. Lee, Jr.), Nov., 905

Shrinkage test
Application Research on Anti-Cracking Agent for Semi-Rigid Base (Hui Luo, Hong-Ping Zhu, Jian-Ming Zi, Ying Wang, and Yong-Fa Lu), Jan., 171

Signal-to-maximum baseline deviation ratio
Measurement and Prediction of Heat of Hydration of Portland Cement Using Isothermal Conduction Calorimetry (Ahmadreza Sedaghat, A. Zayed, and Paul Sandberg), Nov., 943

Similarity test strategy
Accelerated Slam Testing of Vehicle Door Plate Module Using Vibration Exciter (Chan-Jung Kim, Bong-Hyun Lee, and Yeon June Kang), Jul., 659

Simulation
Decision Procedure for the Weibull Distribution Based on Run Lengths of Conforming Items (Muhammad Aslam, Mohammad Saber Fallah Nezhad, and Muhammad Azam), Sep., 826

Single sampling plan
Evaluation of Single Sampling Plans by Attributes Using Mixture of Two Distributions (A. Loganathan, P. Muthu Krishnan, R. Vijayaraghavan, and M. Saral), Jul., 675

Slam testing
Accelerated Slam Testing of Vehicle Door Plate Module Using Vibration Exciter (Chan-Jung Kim, Bong-Hyun Lee, and Yeon June Kang), Jul., 659

Small initial crack
Method for Assessing Applicability of an Artificial Flaw as a Small Initial Crack for Fatigue Limit Evaluation and Its Application to a Drill Hole and an FIB Processed Sharp Notch in Annealed 0.45% Carbon Steel (Junji Sakamoto, Yoshimasa Takahashi, Yuuta Aono, and Hiroshi Noguchi), March, 194

Small punch test
A Solution for Estimating the Tensile Yield Strength From Small Specimens (Jonathan Mak, Tao Wei, Richard Wuhrer, Wing Yeung, Greg Heness, and Zhang Di), Jul., 647

Smart living technology
Evaluating Smart Living Technology Strategies Using the Analytic Network Process (Lon-Fon Shieh, Ching-Chiang Yeh, and Ming-Cheng Lai), Nov., 1011

Software
Computation and Uncertainty Evaluation of Offset Yield Strength (Ariel E. Matusevich, Julio C. Massa, and Reinaldo A. Mancini), March, 217

Software evaluation
Dynamic Software Testing and Evaluation With State Space Method (Yunfei Yin and Haichao Guan), May, 403

Software testing
Dynamic Software Testing and Evaluation With State Space Method (Yunfei Yin and Haichao Guan), May, 403

Soil-structure interaction
Centrifuge Model Test Study of Static and Cyclic Behavior of a Pile Foundation for an Offshore Wind Generator (Ga Zhang, Bing Rong, and Ping Fu), Sep., 701

Solid model generation
Validating Computational Models from Laser Scanning Data for Historic Facades (Linh Truong-Hong and Debra F. Laefer), May, 481

S-shaped function
Measurement and Prediction of Heat of Hydration of Portland Cement Using Isothermal Conduction Calorimetry (Ahmadreza Sedaghat, A. Zayed, and Paul Sandberg), Nov., 943

SSI
Modal Identification of Different RC Frames Using Experimental Measurements (Mehmet Emin Arslan and Ahmet Durmuş), Nov., 970

Standby
Analysis of the Machine Repair Models With Multi-Threshold Synchronous Vacations (Chia-Huang Wu, Jau-Chuan Ke, and Gautam Choudhury), May, 366

State space
Dynamic Software Testing and Evaluation With State Space Method (Yunfei Yin and Haichao Guan), May, 403

Steady-state method
Evaluation of Effective Thermal Conductivity for Mineral Cast Structural Materials Using Steady-State and Transient Methods (A. Selvakumar and P. V. Mohanram), Jul., 685

Steel fiber reinforced concrete
A Study on the Residual Fatigue Strain and Damage of Steel Fiber Reinforced Recycled Concrete Under Constant Amplitude Flexural Fatigue Loading (Yang Runnian and Wei Demin), May, 465
Shrinkage and Creep of Steel Fiber Reinforced Normal Strength Concrete (Drago Saje, Branko Bandelj, Jakob Sušteršič, Jože Lopatič, and Franc Saje), Nov., 959

Stereovision
Evaluation of Adult Body Adiposity, Size, and Shape by Stereovision Imaging (M. Reese Pepper, Jeanne H. Freeland-Graves, Wurong Yu, Phillip R. Stanforth, and Bugao Xu), Jan., 131

Stiffness
Exploration of a Performance Test for Emulsion Treated Asphalt Surfaces (Andrew Braham, Isaac L. Howard, and Jason Barham), March, 269

Stone matrix asphalt
Performance Evaluation of Asphalt-Rubber Stone Matrix Asphalt Mixtures with Warm Mix Asphalt Additives (Weidong Cao and Shutang Liu), Jan., 141

Stone treatment
Effect of Working Parameters on Excavation Rate and Specific Energy on Surface Treatment With Pure Water Jet (Yilmaz

Ozcelik, Raimondo Ciccu, and Augusto Bortolussi), Jan., 104

Strain aging
An Investigation of Hydrogen Environment Effect on the Strain Aging of Low-Carbon Steel through Vickers Hardness Test (Dongsun Lee, Aki-nori Yamamoto, Yasuji Oda, and Hiroshi Noguchi), Jan., 69

Strain measurement
Improved Digital Image Correlation Method for Eliminating Pixel Shape-Induced Errors in Shear-Strain Calculations (Bei Peng, Chengcheng Huang, Wu Zhou, Huijun Yu, and Zhi Zeng), March, 231

Stress
Impedance Spectroscopy Characterization of a Piezoresistive Structural Polymer Composite Bulk Sensor (C. Vipulanandan and P. Prashanth), Nov., 898

Stress-energy
Application of the Stress-Energy Method for Generating Corrugated Board Cushion Curves (Matthew Daum, Duncan Darby, Gregory Batt, and Lisi Campbell), Jul., 590

Stress-energy method
Statistical Analysis of the Stress-Energy Methodology Applied to Cushion Curve Determination (Kendalyn Paulin, Gregory Batt, and Matthew Daum), May, 409

Stress-life fatigue
Assessment of the Mean-Stress Sensitivity Factor Method in Stress-Life Fatigue Predictions (Robert Burger and Yung-Li Lee), March, 200

Stress state
Stress State of GaN Epilayer Grown on Sapphire and 6H-SiC Substrates (Kexiong Zhang, Hongwei Liang, Shiwei Song, Dechao Yang, Rensheng Shen, Yang Liu, Xiaochuan Xia, Yingmin Luo, and Guotong Du), Sep., 798

Stripping
Behavior of Selected Warm Mix Asphalt Additive Modified Binders and Prediction of Dynamic Modulus of the Mixes (Zahid Hossain and Musharraf Zaman), Jan., 159

Structural health monitoring
Feature Assimilation for Vibration Based Damage Detection (Saurabh Prabhu and Sez Atamturktur), Jan., 39
Variability of Modal Parameter Estimations Using Two Different Output-Only System Identification Methods (Ozgur Ozcelik and Mohammad Salavati), Nov., 1001

Subgridding FDTD
Time Domain Microwave Imaging of a Buried Homogeneous Dielectric Cylinder in a Slab Medium by Asynchronous Particle Swarm Optimization (Chien-Ching Chiu, Chung-Hsin Huang, Ching-Lieh Li, and Lung-Fai Tuen), May, 417

Sugarcane bagasse
Carboxyl Modification of Sugarcane Bagasse Hemicelluloses With Succinic Anhydride in Aqueous Solution (Lijun Wang, Xinliang Liu, Mengling Weng, Fusheng Wu, Zhoujun Li, and Shuangfei Wang), May, 517

Superpave
Toward Development of a New Thermal Cracking Test Using the Dynamic Shear Rheometer (Haifang Wen and Sushanta Bhusal), May, 425

Superplasticizer
Evaluation of Effect of Superplasticizer on Performance of Self-Compacting Concrete (Shamsad Ahmad), Sep., 754

Supply chain
An Application of AHP and Sensitivity Analysis for Measuring the Best Strategy of Reverse Logistics: A Case Study of Photovoltaic Industry Chain (Chun-Yueh Lin and Yih-Chearng Shiue), May, 386

Support vector machine
CBR-Based Fuzzy Support Vector Machine for Financial Distress Prediction (Yu Cao and Xiaohong Chen), Sep., 833

Support vector regression
A Hybrid Model by Empirical Mode Decomposition and Support Vector Regression for Tourist Arrivals Forecasting (Ming-Cheng Lai, Ching-Chiang Yeh, and Lon-Fon Shieh), May, 351

Surface free energy
Mechanistic Evaluation of the Effect of WMA Additives on Wettability and Moisture Susceptibility Properties of Asphalt Mixes (Rouzbeh Ghabchi, Dharamveer Singh, Musharraf Zaman, and Qingyan Tian), Nov., 933

Surface treatment
Effect of Working Parameters on Excavation Rate and Specific Energy on Surface Treatment With Pure Water Jet (Yilmaz Ozcelik, Raimondo Ciccu, and Augusto Bortolussi), Jan., 104

Sustainable
Evaluation of a Cryogenic Sprayer Using Liquid Nitrogen and a Ballasted Roller for Weed Control (Matthew A. Cutulle, Gregory R. Armel, James T. Brosnan, Dean A. Kopsell, William E. Hart, J. Javier Vargas, Lori A. Gibson, Rebecca E. Messer, Alex J. McLemore, and H. Adam Duncan), Nov., 869

Sweep test
Use of Sweep Test for Emulsion and Hot Asphalt Chip Seals: Laboratory and Field Evaluation (Nazimuddin M. Wasiuddin, Amanda Marshall, Nibert E. Saltibus, Aziz Saber, Christopher Abadie, and Louay N. Mohammad), March, 289

Swelling
Expansive Clay Suction Measurements Using Filter Paper and Polymer-Capacitance Sensor Methods (Landris T. Lee, Jr.), Nov., 905

Synchronous vacation policy
Analysis of the Machine Repair Models With Multi-Threshold Synchronous Vacations (Chia-Huang Wu, Jau-Chuan Ke, and Gautam Choudhury), May, 366

System identification
Feature Assimilation for Vibration Based Damage Detection (Saurabh Prabhu and Sez Atamturktur), Jan., 39

T

TAFT
A New Device for Simulating Athlete-to-Surface Interactions on Natural and Synthetic Turf (Adam W. Thoms, James T. Brosnan, Max R. Paquette, Songning Zhang, and John C. Sorochan), May, 497

Technique for order preference by similarity to an ideal solution (TOPSIS)
An Evaluation Model Using Fuzzy TOPSIS and Goal Programming for TQM Consultant Selection (Chin-Nung Liao), Jan., 122

Temperature effects
Apparatus for Geosynthetic Interface Testing and Evaluation Under Elevated Temperature Conditions (Tanay Karademir and J. David Frost), March, 313

Temperature-controlled chamber
Apparatus for Geosynthetic Interface Testing and Evaluation Under Elevated Temperature Conditions (Tanay Karademir and J. David Frost), March, 313

Tensile specimen fabrication
Development of a New Testing Procedure for Performing Tensile Tests on Specimens with Sub-Millimetre Dimensions (Georg B. Rathmayr, Andrea Bachmaier, and Reinhard Pippan), Jul., 635

Tensile strength (TS)
In Situ Observation and Model Test on Zonal Disintegration in Deep Tunnels (Xu-Guang Chen, Qiang-Yong Zhang, Yuan Wang, Shu-Cai Li, and Han-Peng Wang), Nov., 990

Tensile test setup
Development of a New Testing Procedure for Performing Tensile Tests on Specimens with Sub-Millimetre Dimensions (Georg B. Rathmayr, Andrea Bachmaier, and Reinhard Pippan), Jul., 635

Tension test
Computation and Uncertainty Evaluation of Offset Yield Strength (Ariel E. Matusevich, Julio C. Massa, and Reinaldo A. Mancini), March, 217

Ternary-value image
Study on Glass Defect Inspection Based on Projecting Grating Method (Yong Jin,

Zhaoba Wang, Linquan Zhu, Jiliang Yang, and Bo Wei), March, 332

Terrestrial laser scanning data
Validating Computational Models from Laser Scanning Data for Historic Facades (Linh Truong-Hong and Debra F. Laefer), May, 481

Theoretical calculation
Measurement and Evaluation of the Thermal Expansion Coefficient of Rock-Filled Concrete (Jin-Ting Wang, Shuo Wang, and Feng Jin), Nov., 951

Thermal cracking
Thermal Cracking Potential of High RAP-WMA Evaluated With Bending Beam Rheometer Mixture Beam Test (Jesse D. Doyle and Isaac L. Howard), March, 236
Toward Development of a New Thermal Cracking Test Using the Dynamic Shear Rheometer (Haifang Wen and Sushanta Bhusal), May, 425

Thermal degradation
An Evaluation of the Non-Isothermal and Isothermal Pyrolysis of Polyether Sulfone in Thermogravimetric Analysis (Mu-Hoe Yang and Yeuh-Hui Lin), Jul., 619

Thermal expansion coefficient
Measurement and Evaluation of the Thermal Expansion Coefficient of Rock-Filled Concrete (Jin-Ting Wang, Shuo Wang, and Feng Jin), Nov., 951

Thermoelectric cooling
Experimental Testing and Evaluation of Parameters on the Extraction of Water from Air Using Thermoelectric Coolers (F. L. Tan and S. C. Fok), Jan., 96

Thermogravimetry
An Evaluation of the Non-Isothermal and Isothermal Pyrolysis of Polyether Sulfone in Thermogravimetric Analysis (Mu-Hoe Yang and Yeuh-Hui Lin), Jul., 619

THIN
Design and Evaluation of Low-Latency and Shortest-Path Routing Algorithm for Triplet-Based Hierarchical Interconnection Network (Yang Zhang and Feng Shi), Jul., 541

Time domain
Time Domain Microwave Imaging of a Buried Homogeneous Dielectric Cylinder in a Slab Medium by Asynchronous Particle Swarm Optimization (Chien-Ching Chiu, Chung-Hsin Huang, Ching-Lieh Li, and Lung-Fai Tuen), May, 417

Time of application
Impact of Leaf/Bunch Ratio and Time of Application on Yield and Fruit Quality of Barhi Date Palm Trees (*Phoenix dactylifera* L.) Under Saudi Arabian Conditions (Alaa El-Din K. Omar, S. S. Soliman, and M. A. Ahmed), Sep., 813

Top-down cracking
Development of a Composite Specimen Interface Cracking (CSIC) Test for Top-Down Cracking (Yu Chen, Gabriele Tebaldi, Reynaldo Roque, and George Lopp), Jul., 625
Investigation of Delamination on I-65 in Indiana (Jusang Lee, Hyungjun Ahn, Ayesha Shah, and Kurt Sommer), Sep., 745

TOPSIS
Evaluating Convention Destination Images in Australia and Asia (Chin-Tsai Lin and Chiu-Wen Lin), Sep., 851

Total focusing method
A Study of Total Focusing Method for Ultrasonic Nondestructive Testing (Po-Yen Tseng, Young-Fo Chang, Chao-Ming Lin, Wei-Jen Nien, Chih-Hsiung Chang, and Chih-Chung Huang), Jul., 557

Total quality management (TQM)
An Evaluation Model Using Fuzzy TOPSIS and Goal Programming for TQM Consultant Selection (Chin-Nung Liao), Jan., 122

Toughness
Loading Rate Concerns in ASTM C1609 (N. Banthia and S. T. Islam), Nov., 1032

Tourist arrivals
A Hybrid Model by Empirical Mode Decomposition and Support Vector Regression for Tourist Arrivals Forecasting (Ming-Cheng Lai, Ching-Chiang Yeh, and Lon-Fon Shieh), May, 351

TPS method
Evaluation of Effective Thermal Conductivity for Mineral Cast Structural Materials Using Steady-State and Transient Methods (A. Selvakumar and P. V. Mohanram), Jul., 685

Transmission tower
Evaluation of Guy Anchorage Strength in Clay for Transmission Tower (Warat Kongkitkul, Sorawut Srisakorn, Thitapan Chantachot, Sompote Youwai, Pornkasem Jongpradist, and Chaloempon Bunjongruksa), Jul., 564

Transmission-mode projecting grating
Study on Glass Defect Inspection Based on Projecting Grating Method (Yong Jin, Zhaoba Wang, Linquan Zhu, Jiliang Yang, and Bo Wei), March, 332

Triaxial compression test
Particle Breakage of Cement Ellipsoid Aggregate—Part II: Investigation of Particle Crushing (Bing-yin Zhang, Yu-xin Jie, and De-zhi Kong), Sep., 761

Two-phase flow dynamics
Measuring Principles of a Thrust Flow Transducer and Its Applications in River Flow Velocity (Xiao-min Chang, Xiao-yan Zhang, and Jian-min Qin), Nov., 894

Two-phase material
Evaluation of Effective Thermal Conductivity for Mineral Cast Structural Materials Using Steady-State and Transient Methods (A. Selvakumar and P. V. Mohanram), Jul., 685

Types
Evaluation of Effect of Superplasticizer on Performance of Self-Compacting Concrete (Shamsad Ahmad), Sep., 754

U

Ultra-high-performance concrete
Effect of Steel Fibers and Thermal Cycles on Fracture Properties of Ultra-High-Performance Concrete (Ibrahim Hakeem, Abul K. Azad, and Shamsad Ahmad), May, 458

Uncertainty
Computation and Uncertainty Evaluation of Offset Yield Strength (Ariel E. Matusevich, Julio C. Massa, and Reinaldo A. Mancini), March, 217

Uncertainty quantification
Variability of Modal Parameter Estimations Using Two Different Output-Only System Identification Methods (Ozgur Ozcelik and Mohammad Salavati), Nov., 1001

Uniaxial die compaction
An Experimental Device for Material Characterization of Powder Materials (Per Lindskog, Daniel C. Andersson, and Per-Lennart Larsson), May, 504

Uniaxial tensile test
Development of a New Testing Procedure for Performing Tensile Tests on Specimens with Sub-Millimetre Dimensions (Georg B. Rathmayr, Andrea Bachmaier, and Reinhard Pippan), Jul., 635

Unstrained compressive strength (UCS)
In Situ Observation and Model Test on Zonal Disintegration in Deep Tunnels (Xu-Guang Chen, Qiang-Yong Zhang, Yuan Wang, Shu-Cai Li, and Han-Peng Wang), Nov., 990

V

Validation
A Method to Obtain Straight Crack Fronts During Pre-Cracking of Compact Tension Specimens (Martin Oberg), Sep., 858

Valve reed
Failure Analysis of a Set of Flapper Valves Under ALT With Alternative Test Device (J. A. Martins, I. Ferreira, D. Leite, and E. C. Romão), March, 324

Vertical movement
Monitoring of Vertical Movement in a Four-Story Wood-Frame Building in Coastal British Columbia (Jieying Wang, Chun Ni, and Gamal Mustapha), Jul., 611

Vibration testing
Feature Assimilation for Vibration Based Damage Detection (Saurabh Prabhu and Sez Atamturktur), Jan., 39

Vickers
Optimization of Vickers Hardness Parameters for Micro- And Macro-Indentation of Grade 91 Steel (J. A. Siefert, J. P. Shingledecker, and J. D. Parker), Sep., 778

Vickers hardness
An Investigation of Hydrogen Environment Effect on the Strain Aging of Low-Carbon Steel through Vickers Hardness Test (Dongsun Lee, Aki-nori Yamamoto, Yasuji Oda, and Hiroshi Noguchi), Jan., 69

Visco-elastic dynamic response
Effect of Temperature and Frequency on Visco-Elastic Dynamic Response of Asphalt Mixture (Peilong Li, Zhan Ding, and Zhengqi Zhang), Jul., 571

Viscoelastic properties
Behavior of Selected Warm Mix Asphalt Additive Modified Binders and Prediction of Dynamic Modulus of the Mixes (Zahid Hossain and Musharraf Zaman), Jan., 159

Viscoelasticity
Rate- and Temperature-Dependent Fracture Characteristics of Asphaltic Paving Mixtures (Soohyok Im, Yong-Rak Kim, and Hoki Ban), March, 257

Viscosity
Evaluation of Asphalt Blended With Low Percentage of Carbon Micro-Fiber and Nanoclay (Hui Yao, Zhanping You, Liang Li, Shu Wei Goh, Julian Mills-Beale, Xianming Shi, and David Wingard), March, 278
Rheological Characterization of Asphalt Concrete Using a Shear Box (Safwat F. Said, Hassan Hakim, and Olle Eriksson), Jul., 602

W

Warm mix asphalt
Performance Evaluation of Asphalt-Rubber Stone Matrix Asphalt Mixtures with Warm Mix Asphalt Additives (Weidong Cao and Shutang Liu), Jan., 141
Fatigue Analysis of Asphalt Concrete under Indirect Tensile Mode of Loading Using Crack Images (Manh Tuan Nguyen, Hyun Jong Lee, and Jongeun Baek), Jan., 148
Behavior of Selected Warm Mix Asphalt Additive Modified Binders and Prediction of Dynamic Modulus of the Mixes (Zahid Hossain and Musharraf Zaman), Jan., 159
Thermal Cracking Potential of High RAP-WMA Evaluated With Bending Beam Rheometer Mixture Beam Test (Jesse D. Doyle and Isaac L. Howard), March, 236
Mechanistic Evaluation of the Effect of WMA Additives on Wettability and Moisture Susceptibility Properties of Asphalt Mixes (Rouzbeh Ghabchi, Dharamveer Singh, Musharraf Zaman, and Qingyan Tian), Nov., 933

Water jet
Effect of Working Parameters on Excavation Rate and Specific Energy on Surface Treatment With Pure Water Jet (Yilmaz Ozcelik, Raimondo Ciccu, and Augusto Bortolussi), Jan., 104

Water penetration
Pressure Distribution of Dynamic Water Penetration Tests for Curtain Walls (Tai-Kuang Lee, Chien-Yuan Kuo, Austin D. E. Pan, and Yi-Chao Li), May, 471

Wavelet moment invariant
Determination of Dry Rubber Content in Natural Rubber Latex Based on Wavelet-Domain Fluorescence Image (Lin Zhang, Zhimin Zhao, Yuyu Ji, and Lei Ji), Jul., 667

Wearing course
Evaluating Frictional Characteristics of Typical Wearing Course Mixtures in Louisiana (Zhong Wu, Xiaoming Yang, Vivek Lal Das, and Louay N. Mohammad), Jul., 579

Wedge structure
The Damage Investigation of Wedge-Shaped Electromagnetic Riveting Structure of CFRP/Aluminium Alloy (Shengwang Liu, Weifang Zhang, Yufeng Wu, and Yu Chen), March, 188

Weed control
Evaluation of a Cryogenic Sprayer Using Liquid Nitrogen and a Ballasted Roller for Weed Control (Matthew A. Cutulle, Gregory R. Armel, James T. Brosnan, Dean A. Kopsell, William E. Hart, J. Javier Vargas, Lori A. Gibson, Rebecca E. Messer, Alex J. McLemore, and H. Adam Duncan), Nov., 869

Weibull distribution
White OLED Weibull Life Prediction Using Maximum Likelihood Estimation (Jian-ping Zhang, Jiong-lei Wu, Yu Liu, Helen Wu, Aixi Zhou, and Wen-li Wu), Jan., 76
Decision Procedure for the Weibull Distribution Based on Run Lengths of Conforming Items (Muhammad Aslam, Mohammad Saber Fallah Nezhad, and Muhammad Azam), Sep., 826

Welding
Stress-Relaxation Cracking Test for Welded Joints (B. Kuhn, C. Ullrich, H. Tschaffon, T. Beck, and L. Singheiser), March, 207

Welding residual stress
Comparison between Contact and Immersion Method in Ultrasonic Stress Measurement of Welded Stainless Steel Plates (Yashar Javadi, Mehdi Ahmadi Najafabadi, and Mehdi Akhlaghi), Sep., 788

White OLED
White OLED Weibull Life Prediction Using Maximum Likelihood Estimation (Jian-ping Zhang, Jiong-lei Wu, Yu Liu, Helen Wu, Aixi Zhou, and Wen-li Wu), Jan., 76
Lifetime Prediction of White OLED Based on MLE Under Lognormal Distribution (Jian-Ping Zhang, Dong-Liang Li, Wen-Li Wu, Helen Wu, and Wen-Qing Zhu), May, 398

Wind generator
Centrifuge Model Test Study of Static and Cyclic Behavior of a Pile Foundation for an Offshore Wind Generator (Ga Zhang, Bing Rong, and Ping Fu), Sep., 701

Wood shrinkage
Monitoring of Vertical Movement in a Four-Story Wood-Frame Building in Coastal British Columbia (Jieying Wang, Chun Ni, and Gamal Mustapha), Jul., 611

Y

Yazoo clay
Expansive Clay Suction Measurements Using Filter Paper and Polymer-Capacitance Sensor Methods (Landris T. Lee, Jr.), Nov., 905

Yield strength
Computation and Uncertainty Evaluation of Offset Yield Strength (Ariel E. Matusevich, Julio C. Massa, and Reinaldo A. Mancini), March, 217
A Solution for Estimating the Tensile Yield Strength From Small Specimens (Jonathan Mak, Tao Wei, Richard Wuhrer, Wing Yeung, Greg Heness, and Zhang Di), Jul., 647
